

District 3 - Franklin County

Round 34

**STATE CAPITAL IMPROVEMENT PROGRAM
&
LOCAL TRANSPORTATION IMPROVEMENT PROGRAM**

APPLICATION

Project Name: Gender Road Improvements, Phase V
Applicant: City of Canal Winchester, Ohio

Priority 1 Priority 2 Priority 3 Priority 4

Submit application to:

Nathaniel Vogt
District 3 Liaison
Mid-Ohio Regional Planning Commission
111 Liberty Street, Suite 100
Columbus, OH 43215

Deadline – September 9, 2019 by 5:00 p.m.

District 3 Application Checklist Round 34

[X] OPWC Application for Financial Assistance Form

Form OPWC0001.

Place the following attachments immediately after the OPWC application. Templates are available in the application material:

- Authorizing Legislation
- Chief Financial Officer Certification / Loan Repayment Letter
- Detailed Engineer's Estimate
- Certification of Detailed Cost Estimate & Design Service Capacity/Useful Life
- Cooperative Agreement (if applicable)
- Farmland Preservation Review Letter (if applicable)

[X] District 3 SCIP/LTIP Application – Round 34

The submittal must include all documents in PDF format.

One hard copy submittal of the application is encouraged, but not required.

District 3 Supportive Documentation Checklist

[X] Plan View or Map

Attach a plan view or map illustrating the scope or limits of the project

[X] A1) Physical Condition

Support for the selected condition rating (e.g., pavement condition rating form or data, ODOT Bridge Inspection Field Report, documentation of waterline break frequency etc.). Photos depicting the physical condition are encouraged.

[X] A3) Public Safety

Supportive evidence (such as letters, photos, media articles, etc.) is required for each unsafe condition.

[NA] A4) Public Health Problem

Supportive evidence (such as letters, photos, media articles, enforcement actions, etc.) is required. Contamination must be documented with evidence of the presence of contamination in excess of standards protective of public health.

[NA] A5) Economic Growth & Development

A5a) Signed letter from an economic development entity

A5b) Signed contract or letter from the commercial developer

A5c) Development proposal stating number of permanent jobs that will be located there and the geographical area from which any existing jobs would be relocating.

- [X] A6) Congestion**
Level of service calculation (using the Highway Capacity Manual, Synchro or similar, including growth rate rationale and showing peak hour, timing, and movements) If current ADT is not from MORPC or ODOT, provide a traffic count report.
- [X] A7) Public Involvement**
Written comments, public meeting notices and sign-in sheets, etc.
- [X] A8) Recognized Need**
Excerpts of plans, studies & project lists; signed engineering design contract
- [X] A9) Service to the District**
For road and bridge projects, provide traffic count report only if the ADT is not from MORPC or ODOT. For other project types, provide a map of the service area.
- [X] A10) Special Conditions/Important Community Facilities**
Documentation of the number of users of community facilities; other supportive documentation.
- [X] A12) Ability & Effort to Finance the Project**
Annual Tax Budget for the year commencing January 1, 2020. Identify portions of the budget eligible to fund this project.
- [X] A13) Special Tax or Fee**
Documentation (e.g. legislation) for each specific tax or fee, with the exception of the optional motor vehicle license fee.
- [NA] A15) Joint Financial Partnerships**
Provide a letter of commitment from another local subdivision or a cooperative agreement between the local subdivisions that documents the financial responsibilities of each party. If the application is successful, a cooperative agreement will be required to receive OPWC funding.
- [NA] S1) Applicant Match**
Letter of commitment or intent from another entity with maintenance responsibility making a financial or in-kind contribution.
- [NA] S2) Other Match**
Letter of commitment or intent from another entity making a financial or in-kind contribution that does **not** have maintenance responsibility.
- [NA] S5) Useful Life**
Documentation for any components with a useful life exceeding worksheet guidance
- [X] Design Service Capacity & Useful Life Worksheet**
- S5) Useful Life
 - S8) Percent New/Expansion
 - S9) Percent Road, Bridge, or Storm Drainage

3.0 Project Schedule

| | | |
|---|------------------------------------|----------------------------------|
| 3.1 Engineering / Design / Right of Way | Begin Date: _____ 01/01/2020 _____ | End Date: _____ 01/01/2021 _____ |
| 3.2 Bid Advertisement and Award | Begin Date: _____ 01/02/2021 _____ | End Date: _____ 03/01/2021 _____ |
| 3.3 Construction | Begin Date: _____ 03/30/2021 _____ | End Date: _____ 10/30/2021 _____ |

Construction cannot begin prior to release of executed Project Agreement and issuance of Notice to Proceed.

Failure to meet project schedule may result in termination of agreement for approved projects. Modification of dates must be requested in writing by project official of record and approved by the Commission once the Project Agreement has been executed.

4.0 Project Information

If the project is multi-jurisdictional, information must be consolidated in this section.

4.1 Useful Life / Cost Estimate / Age of Infrastructure

Project Useful Life: _____ 20 _____ Years Age: _____ 2010 _____ (Year built or year of last major improvement)

Attach Registered Professional Engineer's statement, with seal or stamp and signature confirming the project's useful life indicated above and detailed cost estimate.

4.2 User Information

Road or Bridge: Current ADT 32,780 Year 2019 Projected ADT 43,950 Year 2042

Water / Wastewater: Based on monthly usage of 4,500 gallons per household; attach current ordinances.

Residential Water Rate Current \$ _____ Proposed \$ _____

Number of households served: _____

Residential Wastewater Rate Current \$ _____ Proposed \$ _____

Number of households served: _____

Stormwater: Number of households served: _____

4.3 Project Description

- A: SPECIFIC LOCATION (Supply a written location description that includes the project termini; a map does not replace this requirement.) 500 character limit.

This project is the 5th phase of reconstruction of Gender Rd and will occur at the intersections of Gender Rd with Winchester Blvd and Canal St, which are 1,545 ft and 2,640 ft. south of the US 33 Interchange respectively. Both are signal controlled 4-way intersections. The project will add turn lanes at each to accommodate the growing traffic demands. Work at Canal St begins 200 feet south and 100 feet east of the intersection. Work at Winchester Blvd begins 650 feet south of the intersection

- B: PROJECT COMPONENTS (Describe the specific work to be completed; the engineer's estimate does not replace this requirement) 1,000 character limit.

This project consists of the widening of the Gender Road pavement south of each intersection to add dedicated right turn lanes to the northbound approaches. The project will also reconstruct Canal Street east of Gender Road to provide the appropriate radius for turning trucks. The work will include partial depth and full depth pavement replacement and the modification of the traffic signal as needed to accommodate the new geometry. The project will include incidental improvements such as stormwater drainage, lighting, curb ramps, signage, striping, guardrail etc. as needed.

- C: PHYSICAL DIMENSIONS (Describe the physical dimensions of the existing facility and the proposed facility. Include length, width, quantity and sizes, mgd capacity, etc in detail.) 500 character limit.

New lanes are proposed at 12 ft width. Project includes 1,600 SY partial depth pavement, 430 SY of full depth pavement, 845 SF sidewalk, 1,110 SY of multi-use trail, modifications to the traffic signal, and the related incidental improvements

5.0 Project Officials

Changes in Project Officials must be submitted in writing from an officer of record.

5.1 Chief Executive Officer (Person authorized in legislation to sign project agreements)

Name: Michael Ebert

Title: Mayor

Address: 36 S. High St.

City: Canal Winchester State: OH Zip: 43110

Phone: (614) 837-7493

FAX: (614) 837-0145

E-Mail: mebert@canalwinchesterohio.gov

5.2 Chief Financial Officer (Can not also serve as CEO)

Name: Amanda Jackson

Title: Finance Director

Address: 36 S. High St.

City: Canal Winchester State: OH Zip: 43110

Phone: (614) 837-6937

FAX: (614) 837-0145

E-Mail: ajackson@canalwinchesterohio.gov

5.3 Project Manager

Name: Matthew Peoples

Title: Director of Public Works

Address: 36 S. High St.

City: Canal Winchester State: OH Zip: 43110

Phone: (614) 834-5100

FAX: (614) 837-0145

E-Mail: mpeoples@canalwinchesterohio.gov

6.0 Attachments / Completeness review

Confirm in the boxes below that each item listed is attached (Check each box)

- A certified copy of the legislation by the governing body of the applicant authorizing a designated official to sign and submit this application and execute contracts. This individual should sign under 7.0, Applicant Certification, below.
- A certification signed by the applicant's chief financial officer stating the amount of all local share funds required for the project will be available on or before the dates listed in the Project Schedule section. If the application involves a request for loan (RLP or SCIP), a certification signed by the CFO which identifies a specific revenue source for repaying the loan also must be attached. Both certifications can be accomplished in the same letter.
- A registered professional engineer's detailed cost estimate and useful life statement, as required in 164-1-13, 164-1-14, and 164-1-16 of the Ohio Administrative Code. Estimates shall contain an engineer's seal or stamp and signature.
- A cooperative agreement (if the project involves more than one subdivision or district) which identifies the fiscal and administrative responsibilities of each participant.
- Farmland Preservation Review - The Governor's Executive Order 98-IV, "Ohio Farmland Protection Policy" requires the Commission to establish guidelines on how it will take protection of productive agricultural and grazing land into account in its funding decision making process. Please include a Farm Land Preservation statement for projects that have an impact on farmland.
- Capital Improvements Report. CIR Required by O.R.C. Chapter 164.06 on standard form.
- Supporting Documentation: Materials such as additional project description, photographs, economic impact (temporary and/or full time jobs likely to be created as a result of the project), accident reports, impact on school zones, and other information to assist your district committee in ranking your project. Be sure to include supplements which may be required by your local District Public Works Integrating Committee.

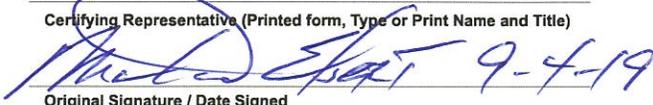

7.0 Applicant Certification

The undersigned certifies: (1) he/she is legally authorized to request and accept financial assistance from the Ohio Public Works Commission as identified in the attached legislation; (2) to the best of his/her knowledge and belief, all representations that are part of this application are true and correct; (3) all official documents and commitments of the applicant that are part of this application have been duly authorized by the governing body of the applicant; and, (4) should the requested financial assistance be provided, that in the execution of this project, the applicant will comply with all assurances required by Ohio Law, including those involving Buy Ohio and prevailing wages.

Applicant certifies that physical construction on the project as defined in the application has NOT begun, and will not begin until a Project Agreement for this project has been executed with the Ohio Public Works Commission. Action to the contrary will result in termination of the agreement and withdrawal of Ohio Public Works Commission funding from the project.

Michael Ebert, Mayor

ORDINANCE NO. 19-051

AN ORDINANCE AUTHORIZING THE MAYOR AND FINANCE DIRECTOR TO SEEK FINANCIAL ASSISTANCE FROM THE OHIO PUBLIC WORKS COMMISSION FOR FUNDING OF THE GENDER ROAD IMPROVEMENTS, PHASE V PROJECT, AND DECLARING AN EMERGENCY

WHEREAS, Pursuant to article VIII, Section 2K of the Ohio Constitution, the state of Ohio is authorized to issue bonds and other obligations of the state for the purpose of financing public infrastructure capital improvements of political subdivisions as designated by law; and,

WHEREAS, pursuant to Section 164.06 of the Ohio Revised Code, the District Three Public Works Integrating Committee has been created to accept, evaluate and recommend applications for state financing of capital improvement projects of political subdivisions in Franklin County; and,

WHEREAS, pursuant to Section 164.05 of the Ohio Revised Code, the Ohio Public Works Commission has been created to accept and approve applications for stated financing of capital infrastructure improvement projects of political subdivisions in Franklin County; and,

WHEREAS, the City has conducted a capital inventory and needs assessment and has determined that it is necessary to submit applications for financial assistance for the Gender Rd. Phase V infrastructure improvement project.

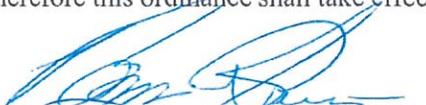

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE CITY OF CANAL WINCHESTER, STATE OF OHIO:

Section 1. That the Mayor and Finance Director are hereby authorized to apply to the District Three Public Works Integrating Committee and the Ohio Public Works Commission for financial assistance for the Gender Road Improvements, Phase V Project.

Section 2. The Mayor and Finance Director are further authorized to enter into any agreement as may be necessary and appropriate for obtaining this financial assistance in conjunction with the recommendations of the Director of Public Service, and approved as to form by the Law Director in accordance with all authority granted to and limitations upon by the Finance Director.

Section 3. That this ordinance is hereby declared to be an emergency measure, necessary for the preservation of public health, safety and welfare, such emergency arising for the need to meet a specific application submission schedule; wherefore this ordinance shall take effect and be in force from and after its passage.

DATE PASSED 9-3-19

PRESIDENT OF COUNCIL

ATTEST M. C. P. 166
Acting Clerk

MAYOR

DATE APPROVED 9-4-19

APPROVED AS TO FORM:

LEGAL COUNSEL

I hereby certify that the ordinance as set forth above was published for a period of not less than fifteen days after passage by the Council, by posting a copy thereof in not less than three (3) public places in the municipal corporation, as determined by Council and as set forth in the Canal Winchester Charter.

Clerk of Council
Acting Clerk

**CHIEF FINANCIAL OFFICER'S CERTIFICATION OF LOCAL FUNDS /
LOAN REPAYMENT LETTER**

September 9, 2019

I understand the staff administrative fee for the SCIP & LTIP programs is funded from a contribution of up to 1% of the original award amount. I understand that all communities receiving awards in Round 34 will receive an invoice during second quarter of 2021 for administrative services. In addition, I understand that payment for these services must come from local general funds and not from the award funds.

I, Finance Director of the City of Canal Winchester, hereby certify City of Canal Winchester has the amount of \$199,960 in the General Fund and that this amount will be used to pay the local share for the Gender Road Improvements, Phase 5 Project when it is required.

I, Finance Director of the City of Canal Winchester, hereby certify that the City of Canal Winchester has / will have / will collect the amount of \$750,000 in the General Fund and that this amount will be used to repay the Ohio Public Works Commission SCIP or RLP loan requested for the Gender Road Improvements, Phase 5 Project over a 20 term.

Amanda Jackson, Finance Director, City of Canal Winchester

Notes

Estimate assumes that traffic will be maintained through the intersection during construction.

Estimate assumes no acquisitions are required for the above Project.

Pricing reflects probable construction costs obtainable in the project locality on the date of this statement of probable costs. Unit rates have been obtained from historical records and/or discussion with contractors. The unit rates reflect current bid costs in the area. This estimate is a determination of fair market value for the construction of this project. It is not a prediction of low bid. Pricing assumes competitive bidding for every portion of the construction work for all subcontractors and general contractors. Experience indicates that a fewer number of bidders may result in higher bids, conversely an increased number of bidders may result in more competitive bids.

Since EMH&T has no control over the cost of labor, material, equipment, or over the contractor's method of determining prices, or over the competitive bidding or market conditions at the time of bid, the statement of probable construction cost is based on industry practice, professional experience and qualifications, and represents EMH&T's best judgment as a consultant familiar with the construction industry. EMH&T does not guarantee that the proposals, bids, or the construction cost will not vary from opinions of probable cost prepared by them.

Certification of Detailed Cost Estimate & Design Service Capacity/Useful Life

(Must be completed by a certified professional engineer)

Project: Gender Road Improvements Phase V

Detailed Cost Estimate

As required by Rule 164-1-16(A) of the Ohio Administrative Code, I hereby certify the accuracy of the dollar amounts contained in Project Estimated Costs - Section 1.1 on the OPWC Application and as outlined on the Detailed Cost Engineer's Cost Estimate.

Design Service Capacity

In addition, as per 164-1-14, I attest that the costs entailed in this project are **100 % for repair** of existing infrastructure without substantially increasing design service capacity or replacement of existing infrastructure with infrastructure that has a design service capacity substantially equivalent to the design service capacity of the existing infrastructure and **0 % for new** infrastructure that adds to existing infrastructure or expansion that replaces existing infrastructure with infrastructure that has a design service capacity substantially greater than the design service capacity of the existing infrastructure, regardless of the relative physical dimensions of the existing or replacement infrastructure or that uses a substantially different service technology than is used by the existing infrastructure.

Useful Life

Further, as required by Rule 164-1-13(A) of the Ohio Administrative Code, I hereby state that this project will result in infrastructure with a **minimum useful life of 20.78 years** as determined in accordance with generally accepted engineering principles and practices within this state and taking into account the specific climatic and other environmental conditions of the infrastructure's site as well as the infrastructure's full, anticipated design use loads.

Erik Meininger 9/6/2019

Professional Engineer's Signature & Official Seal

**Ohio Public Works Commission
State Capital Improvements Program (SCIP) &
Local Transportation Improvement Program (LTIP)**

**District 3 Application
Round 34**

In addition to this application form and attachments, applicants must submit the Ohio Public Works Commission Application for Financial Assistance, following Instructions Modified for Applications to District 3. Please see the District 3 Applicant Manual for Round 34 for program policies and procedures.

Projected Funds Available for Round 34

The OPWC has provided preliminary allocations for SCIP and LTIP for Round 34, which is the fiscal year beginning July 1, 2020. The projections for District 3 are shown below.

| Program | Form of Assistance | Projected Amount |
|----------------|--|-------------------------|
| SCIP | Grants (maximum amount) | \$14,330,700 |
| SCIP | Loans/Debt Support (minimum amount) | \$1,592,300 |
| SCIP | Revolving Loan Program | \$4,032,000 |
| LTIP | Grants | \$6,849,000 |
| | Total | \$26,804,000 |

These projections will be updated in December 2019, during the district's project selection. All programs are subject to appropriation by the General Assembly.

No more than 20% of the SCIP allocation (excluding the Revolving Loan Program) may be used for costs related to new or expanded infrastructure. This constraint does not apply to the LTIP allocation.

Loan interest rates for Round 34 are 0% for all project types.

LTIP Township Set-Aside

Over each five-year funding period, District 3's Public Works Integrating Committee (PWIC) must award at least 20 percent of one-third of the total LTIP allocation to townships. There are four years remaining in the current five-year cycle (Rounds 33-37). After the previous round, District 3 is now approximately \$220,000 short of the five-year minimum amount of LTIP funds to townships.

As explained in the Applicant Manual, District 3 will set aside up to \$400,000 in LTIP funds for townships for each round in order to meet this requirement. If District 3 meets the required township amounts (for a given round or five-year cycle) through the regular LTIP award process, the PWIC may adjust the set-aside.

For Round 34, the set-aside is subject to an adjustment by the PWIC.

APPLICANT EVALUATION CRITERIA – Round 34

Instructions: Read each criterion carefully and respond as directed. Many criteria will ask you to enter information in a table. Enter other information for each criterion under the **RESPONSE** prompts. Note that all responses under Applicant Evaluation Criteria are limited to one page per question.

Each question (A1-A15) has a raw score between 0 and 5 points. The raw score for each criterion will be multiplied by its weight to determine its final score.

Begin by completing the project component chart below. Attach a plan view or map to illustrate the scope of the project.

| Component | Existing? (Y/N) | Quantity | Proposed Change? (Y/N) | Quantity |
|------------------|-----------------|--|------------------------|---|
| ADA curb ramps | Yes | 3 | Yes | 5 |
| Bike lanes | Yes | 1 – east side of Gender Road | Yes | Project will convert lane to multi use path at the intersection of Gender & Canal and Gender & Winchester |
| Bus stop/shelter | No | 0 | No | 0 |
| Curb and gutter | Yes | On Canal St and Winchester Boulevard | Yes | 200 LF |
| Multi-use path | No | 0 | Yes | Converting 825 LF of bike lane to multi use path |
| Road | Yes | 100 LF | Yes | 100 LF of Canal St replaced |
| Roundabout | No | 0 | No | 0 |
| Sanitary sewer | Yes | Existing sewer not impacted by project | Yes | Existing sewer not impacted by project |
| Sidewalks | Yes | At intersections | Yes | 280 SF replaced |
| Street lighting | Yes | Not impacted by project | Yes | Not impacted by project |
| Storm sewer | Yes | Various | Yes | 510 LF pipe, 10 structures |
| Traffic signal | Yes | 2 | Yes | Modifications to both existing signals |
| Turn lane(s) | No | - | Yes | Project creates new right turn lanes on northbound Gender Road at Canal St and Winchester Blvd |
| Waterlines | Yes | Not impacted by project | Yes | Not Impacted by project |
| Other (specify) | | | | |

A1) PHYSICAL CONDITION (Weight: SCIP= 8; LTIP= 6)

Skip this question if your project is 100% new or expansion work.

Condition is based on the amount of deterioration that is field verified or documented exclusive of capacity, serviceability, or health, safety and welfare issues. Condition is rated only on the existing facility being repaired or abandoned. If the existing facility is not being abandoned or repaired, but a new facility is being built, it shall be considered as an expansion project.

Complete chart below for the infrastructure to be repaired or replaced and the applicable project type. Only project types not mentioned elsewhere may complete the "Other" chart. Include supportive documentation for every answer.

Roads, Bridges and Culverts

| Location (Road Segment, Bridge Location, etc.) | Rating (e.g. PCR, Bridge Rating) |
|--|----------------------------------|
| Gender Road at Canal St | 63.15 |
| Gender Road at Winchester Blvd | 67.8 |
| | |
| | |

Water Supply

| | |
|--|----------------|
| Average number of breaks per 1000 miles of pipe | Not applicable |
| Percent of water unaccounted for (out of total produced) | |
| Number of EPA violations in the past year | |
| Peak demand compared to design capacity (percent) | |
| Tuberculation in water lines (Yes/No) | |

Wastewater Systems

| | |
|--|----------------|
| Facility influent flows and/or organic loads compared to design levels (percent) | Not applicable |
| Number of violations that exceed 20% of the NPDES permit limits in the past year * | |
| Have formal enforcement proceedings started? (Yes/No) | |

** Do not include violations due to improper operation of the facility.*

Stormwater Collection

| | |
|---|----------------|
| Average number of breaks per 1000 miles of pipe | Not applicable |
| *Instances of flooding (select one): | |
| After heavy storms, in limited areas | |
| After heavy storms, fairly widespread | |
| Often, in limited areas | |
| Often, fairly widespread | |

** Documentation includes testimony from utility, emergency and public services and/or property owners. Provide pictures if possible.*

Solid Waste

| | |
|---|----------------|
| Start year of operations | Not applicable |
| Percent of approved floor space filled | |
| Estimated remaining life (years and months) | |
| List any best available technology (BAT) features in use: | |

Other (signals, curb ramps, etc.)

| | |
|--|--|
| Construction year | |
| Estimated remaining years of useful life | |
| Year & type of most recent rehabilitation or maintenance | |
| Does the facility meet current standards? | |

For any project type, consider the information provided and select the condition rating that represents the average physical condition of all components of the infrastructure to be repaired or replaced.

| Select Condition | Condition Rating | Description | Points |
|------------------|------------------|---|--------|
| | Good | Requires routine maintenance and periodic repairs to maintain integrity. | 1 |
| | Fair | Requires minor rehabilitation to maintain integrity. | 2 |
| X | Poor | Requires <u>partial</u> reconstruction or extensive rehabilitation to maintain integrity. | 3 |
| | Critical | Requires <u>major</u> reconstruction to maintain integrity. | 4 |
| | Failed | Permanently closed or out of service. Beyond any corrective action. | 5 |

Why did you select the physical condition checked above? Explain. Applicants are encouraged to provide photos depicting the current physical conditions.

For road, bridge, and culvert projects, identify the methodology for rating the condition. Attach documentation of how the rating was determined (with the pavement condition rating form, ODOT Bridge Inspection Field Report, etc.).

RESPONSE:

An engineering consultant evaluated the conditions of the pavement at the 2 intersections being improved by this project. The evaluation utilized the ODOT PCR System evaluation process. The segments within this project area resulted in scores of 63.15 and 67.8 at Canal St and Winchester Blvd respectively, which represents per the ODOT process, a “Fair to Poor” rating, according to the PCR score. For this reason the condition is being rated as “Poor”, requiring partial reconstruction to maintain integrity. See the PCR Forms attached to this application.

A2) CRASHES (Weight: SCIP = 3; LTIP = 6)

Why will the project result in a reduction in the number and/or severity of crashes?

Without a reasonable rationale, the score will be zero.

Do NOT include police crash reports with the application. If the rationale is sufficient, MORPC staff will analyze three years of crash data using information from the Ohio Department of Public Safety and the Ohio Department of Transportation.

RESPONSE:

This project will provide multiple features that will result in a reduction to the number of crashes observed at the intersection. The crashes on record indicate that 40% are rear end crashes, 25% are left turn crashes, 12% are sideswipe crashes, and 10% are angle crashes. The remaining 13% of crashes are of varying types. The improvements proposed herein will reduce these types of crashes.

EMH&T conducted an analysis of the Crash Modifications Factors for the proposed improvements. This is a method of estimating the reduction in crashes that can be anticipated based on proposed safety improvements. The following improvements are expected to reduce crashes as follows:

Provide right turn lane on one major road approach – 9% Reduction

See the attached memo from EMH&T for further detail.

A3) PUBLIC SAFETY (Weight: SCIP = 1; LTIP = 2)

| Check If Applicable | Current Condition | Points (Cumulative, up to 5) |
|---------------------|--|------------------------------|
| | Hazard, icy conditions or media report of hazards | 1 |
| | Insufficient fire hydrant flow | 2 |
| | Geometric issues (sharp curve, severe drop-off, poor sight distance, etc.) | 1 to 3 |
| | Extended closure resulting in rerouted traffic | 3 |
| | Extended closure of bridge or emergency route | 5 |
| | Other unsafe conditions | 1 to 2 |

Complete the chart above. Describe the unsafe conditions or situations caused by the existing infrastructure. Supportive evidence (such as letters, photos, media articles, etc.) is required for each unsafe condition.

RESPONSE:

This project will improve safety at the intersection by creating new turn lanes, upgrading the traffic signals, providing ADA compliant curb ramps, and converting the bike lane to and multi-use path separated from the traffic lanes. The fire department has issued a letter of support for the project, which is included in the supporting documents of this application. See also the attached Crash Data and Crash Modification Factors in the supporting documents for A2.

A4) PUBLIC HEALTH PROBLEM (Weight: SCIP = 5; LTIP = 0)

Check applicable conditions in the chart below.

| Check If Applicable | Current Condition | Points (Cumulative, up to 5) |
|---------------------|---|------------------------------|
| N/A | Infestation of mosquitoes, insects or rodents | 1 to 2 |
| | Basement flooding (stormwater) | 1 to 3 |
| | Basement flooding (sanitary) | 2 to 4 |
| | Health department or EPA orders to fix | 2 to 4 |
| | Biofilm in water lines OR contamination of drinking water | 1 to 4 |
| | Contamination of environment | 2 to 4 |
| | Other public health problem | 1 to 5 |

Describe any public health problems or unhealthy conditions. Explain how the existing infrastructure contributed to them, and how the proposed project will correct or mitigate them. Supportive evidence (such as letters, photos, media articles, enforcement actions, etc.) is required. Contamination must be documented with evidence of the presence of contamination in excess of standards protective of public health.

RESPONSE:

Not Applicable

A5) ECONOMIC GROWTH AND DEVELOPMENT (Weight: SCIP = 3; LTIP = 5)

This criterion relates to the potential of the project to facilitate the creation or retention of commercial (i.e., office, industrial, or manufacturing) jobs in District 3 (Franklin County). Retail or residential development does not receive credit. Depending on the type of documentation provided, applicants can receive points for either A5a or the sum of A5b and A5c, for a maximum of 5 total points.

| Check If Documented | Documentation | Points |
|---------------------|---|--------|
| | A5a) Letter from an economic development entity | 1 |
| OR | | |
| | A5b) Contract or letter from a commercial developer | 3 |
| | A5c) Less than 25 jobs created or retained | 1 |
| | A5c) At least 25 jobs created or retained | 2 |

A5a) Letter from an Economic Development Entity

Provide a copy of a signed letter from an economic development entity not affiliated with the applicant indicating that the project supports the potential creation or retention of commercial (i.e., office, industrial, or manufacturing) jobs in Franklin County.

To receive credit for A5b and A5c, the applicant must provide a satisfactory responses to the three items below:

Is this infrastructure improvement necessary to secure a particular commercial (i.e., office, industrial, or manufacturing) development or redevelopment? If so, please explain the relationship between the project and the development. Stating that the improvement will promote development in the area is not sufficient.

RESPONSE:

Not Applicable

Name of the commercial development.

RESPONSE:

Not Applicable

Identify the type of industry proposed in this commercial development.

RESPONSE:

Not Applicable

A5b) Contract or Letter from the Commercial Developer

Provide a copy of a signed contract or letter of commitment from the commercial developer outlining the proposed plan.

A5c) Creation of New Jobs or Retention of Existing Commercial Jobs

How many permanent new jobs are being created in District 3?

RESPONSE:

No permanent jobs will be created as a result of this infrastructure project. However, temporary construction jobs will be created as a result of this project, which will benefit the local economy.

How many permanent commercial jobs are being retained within District 3? Provide an explanation below or attach documentation that demonstrates that the jobs would have been lost to the district without the development.

RESPONSE:

Not applicable

Provide documentation of a development proposal stating number of permanent jobs that will be located there and the geographical area from which any existing jobs would be relocating. The applicant must provide a letter or agreement from the prospective commercial developer outlining the proposed plan or provide an existing land use plan that this improvement directly supports economic development intended to create commercial/office jobs.

A Community Reinvestment Area (CRA) is ineligible unless the agreement clearly states the CRA focuses on commercial development, not retail or residential development.

A6) CONGESTION (Weight: SCIP = 0; LTIP = 7)

If the facility currently or forecasted to be congested, complete the chart below with the current and design year (opening + 20 years) average daily traffic (ADT) and level of service (LOS) for the no-build and build scenarios.

If current ADT is not from MORPC or ODOT, a traffic count report is required.

Note that the level of service calculation (using the Highway Capacity Manual, Synchro or similar, including growth rate rationale and showing peak hour, timing, and movements) must be included in Supportive Documentation to receive credit.

| Location | ADT | | Opening Year LOS | | Design Year LOS | |
|---------------------------------|---------|-------------|-------------------|----------------|---|---|
| | Current | Design Year | No-Build Scenario | Build Scenario | No-Build Scenario | Build Scenario |
| Gender Road and Winchester Blvd | 32,780 | 43,950 | Not Calculated | Not Calculated | E (northbound right turn) | B (northbound right turn) |
| Gender Road and Canal St | 32,780 | 43,950 | Not Calculated | Not Calculated | E (west bound through and west bound right turn) | D (west bound through and west bound right turn) |

The scoring rubric is below uses the year (current/opening or design) and location that results in the highest score. Improvements beyond LOS C do not receive credit.

| Average Daily Traffic | | | Points |
|-----------------------|----------------|--------|--------|
| >20,000 | 8,000 – 20,000 | <8,000 | |
| - | - | 1 | 1 |
| - | 1 | - | 2 |
| 1 | - | ≥2 | 3 |
| - | ≥2 | - | 4 |
| ≥2 | - | - | 5 |

Please explain how design year ADT was developed, including the growth rate rationale. If these are insufficient, only current ADT and Opening Year LOS will be used to determine the score.

RESPONSE:

A Traffic Analysis was conducted by EMH&T (dated July 29, 2019) and is attached to this application. It was determined that the improvement would improve specific movements LOS for both intersections. The most pronounced improvement at the intersection of Gender and Winchester Blvd occurs on the north bound right turn movement, which improves from a LOS E to LOS B in the build condition as proposed. The most pronounced improvement at the intersection of Gender and Canal Street occurs on the west bound through and west bound right turn movements, which improve from an LOS E to an LOS D in the build condition. See the attached Traffic Analysis and count data.

A7) PUBLIC INVOLVEMENT (Weight: SCIP = 4; LTIP = 4)

Complete the chart below to identify how the applicant has identified the project as a need. Supportive Documentation is required.

| Check If Documented | Public Participation | Required Documentation and Examples | Points (Cumulative, up to 5) |
|---------------------|---|--|------------------------------|
| | Oral comments | Summary of comments received (e.g. council minutes, log of phone calls, 311 records, etc.) | 1 to 2 |
| X | Written comments | Copy of the comments as received (e.g. letter to the editor, email, comments collected at a public meeting, newspaper articles, etc.) | 2 to 3 |
| X | Public meeting for the project held within the past two years | Sign-in sheet, advance notice of meeting (e.g. flyer, newspaper, neighborhood newsletter, electronic postings, etc.) A social media posting, without any other documentation, is not sufficient evidence of a meeting. A regularly occurring council or board meeting is acceptable <i>only</i> if the public receives prior notice of project-specific discussion beyond a typical meeting. | 4 |
| X | Public meeting in combination with written comments | See above | 5 |

The City of Canal Winchester held a public meeting to inform its citizens of the Gender Road Phase V project. This meeting was held on September 3, 2019 at 5:30 PM at the City Town Hall. Representatives from the City attended these meetings, as did the City's Engineering Consultant. Citizens and business owners were made aware of the meeting by a Notice of Public Meeting advertised in a local paper and as posted in a prominent place in the municipal building. At the meeting, the details of the project were reviewed and questions were answered. Meeting attendees were given an opportunity to voice opposition or support for this project. A project questionnaire was also provided at the public meeting and was made available to the public. Comments were received at the meeting in support of the project.

The project received broad support, including from residents, The X Church, Canal Winchester City Schools, and The Opus Group. See the attached letters of support.

See attached copies of meeting notices, meeting minutes, sign-in sheet, and public comments.

A8) RECOGNIZED NEED (Weight: SCIP = 3; LTIP = 3)

| Check If Documented | Required Documentation and Examples | Points (Cumulative, up to 5) |
|---|---|------------------------------|
| X | Identified as first priority below | 1 |
| X (Systematic Signal Timing and Phasing Request, Traffic Analysis) | Plans: <ul style="list-style-type: none"> • Preliminary engineering study complete • Comprehensive or community plan • Special study • Task force findings • Other planning document | 2 |
| X | Programs: <ul style="list-style-type: none"> • Capital Improvement Program (CIP) • Annual budget • Voluntary submission of a Capital Improvement Report (CIR) • Other systematic infrastructure inventory | 1 |
| | Progress/Readiness: <ul style="list-style-type: none"> • Signed engineering design contract specific to the project • Authorized task order within a general contract • A statement that design is in-house (or, for townships and villages, will be completed by the Franklin County Engineer's Office) | 2 |

Complete the chart above to identify how the project was identified as a need. Include an excerpt of the applicable document as proof for each row except priority. If the origin of the excerpt is unclear, also include the cover, introduction or executive summary.

Is the project the applicant's highest priority among the applications (or the only application) submitted this round?

RESPONSE:

 X Yes No

This project is the City's first priority for OPWC funding this round, it appears on the CIP, a Systemic Signal Timing and Phasing (SSTP) Program Request was prepared and submitted to ODOT in March of 2019, and a traffic study has been completed. The SSTP request was accepted and awarded funds by ODOT, see the attached email from Jeremy Thompson in the supporting documents for A8. See the attached supporting documents, including the traffic analysis in the supporting documents for A6.

A9) SERVICE TO THE DISTRICT (Weight: SCIP = 6; LTIP = 6)

Complete the chart below for the applicable project type. Provide the documentation requested in the table to support the number of people or size of area served.

| Facility Type | Measure & Documentation | People/Area Served | Scoring Guidelines | |
|---|--|--|---|---------|
| Road Bridge | Average Daily Traffic (ADT) Include a traffic count report if the ADT is not from MORPC or ODOT. | 32,780 ADT (2019) 43,950 ADT (2042) | Staff reviews current ADTs to establish five groups relative to applications for this round | |
| Waterlines Sanitary Sewer Solid Waste | Number of residents and employees OR Number of residences and businesses Provide a map of the service area. | | <175 people | 1 point |
| | | | 175-231 | 2 |
| | | | 231-519 | 3 |
| | | | 520-1000 | 4 |
| | | | >1000 | 5 |
| ADA Curb Ramps | Number of pedestrians served daily Provide documentation if available. | | Staff compares current and past numbers | |
| Storm Sewer | Tributary drainage area (in acres) Provide a map of the service area. | | <41 acres | 1 point |
| | | | 41-160 | 2 |
| | | | 161-480 | 3 |
| | | | 481-800 | 4 |
| | | | >800 | 5 |

See the traffic analysis in the attachments for A6 for further detail.

A10) AREA WITH SPECIAL CONDITIONS OR IMPORTANT COMMUNITY FACILITIES (Weight: SCIP= 4; LTIP = 4)

List community facilities directly served by the project. Community facilities are those that provide public/institutional services, such as hospitals, schools, police/fire stations, community centers, parks, libraries, etc. The facility or combination of facilities must serve at least 500 people daily to count as one item. Provide documentation of daily users.

| Name of Community Facility | Address/Location | Number of Daily Users |
|----------------------------|------------------|-----------------------|
| | | |
| | | |
| | | |

Complete the table below for other community resources or special conditions directly served by the project.

| Check If Applicable | Community Resources or Special Conditions | Check If Documentation Provided |
|---------------------|--|---------------------------------|
| | Community facilities (from table above) | |
| | Regionally significant facility | |
| | Public housing site or Federal CDBG-designated low-income area | |
| X | Access for persons with disabilities (new sidewalks and ADA curb ramps) | |
| X | COTA route or bus stop within project limits | X |
| | Historic district - must be federal or state approved | |
| X | Tie-in with other improvements, such as neighborhood revitalization, or earlier phases | |

Provide descriptive information to identify the specific resources claimed in the chart above, such as name, address, etc. Do not repeat information from the Community Facilities table above.

RESPONSE:

This project will serve an area that has at least four (3) special conditions attributable:

1) Special Condition – ADA accessibility:

This project will include the construction of a multi-use path that will be constructed in accordance with ADA guidelines. The project includes the construction of 5 curb ramps and the addition of push button controlled pedestrian crossing signals. In addition, the project will correct existing deficient ADA accessibility facilities.

2) Special Condition – Tie-in with previous phases:

This project is the fifth phase of the improvements planned for the Gender Road corridor and is contiguous with the prior improvements. Phases 1, 2, 3, & 4 of the Gender Road improvements were funded through the OPWC program in Rounds 24, 25, 27, and 31 respectively. The project also includes the improvement traffic signals, which are part of a larger plan for traffic signal improvement that is a joint effort between Canal Winchester and the township.

3) COTA Route and Bus Stops:

COTA buses use the intersections that are being improved by this project. COTA Route 25 operates in the corridor providing service to the residents of Canal Winchester. The intersection with Canal Street is the southernmost point of the route. The final stop is between Canal Street and Winchester Boulevard on Prentiss School Drive (one block west of Gender Road). COTA buses use the subject intersections 30 times daily. See the supporting information attached to this application.

Scoring:

2 points for one item

4 points for two items

5 point for three or more items

A11) OTHER INFORMATION (Weight: SCIP = 2; LTIP = 2)

What other information should the District 3 Committee know that would warrant additional points? Highlight qualities and characteristics that would not be evident elsewhere in the application.

Examples:

- Unusual/unique and relevant material
- Innovative green construction techniques (LEED certification, etc.)
- Project characteristics considered under other criteria, which either do not meet the standards to receive points or greatly exceed the guidelines for maximum points

RESPONSE:

The City of Canal Winchester is a vibrant and growing community in central Ohio, as evident by the population growth between 1990 and 2010. The population of the City increased almost 230% in the twenty (20) year period and almost 30% between 2000 and 2010. With the increase in population comes an increase in demand for services and an increase in demand for and on infrastructure that does not always directly correlate to the amount of population growth. The City has taken a proactive stance in regard to the increased demand on its infrastructure, of which the project outlined herein is attributable. The City has recognized the need to continually increase and improve upon its infrastructure, as a direct result of both the experienced and anticipated population growth.

The City is proactively exploring a multitude of funding opportunities and partnerships and methods to help complete the numerous roadway projects throughout the City. The importance of the success of OPWC funding is thus very high and OPWC financial support is essential. If OPWC funding is not secured, then the project may not occur as planned. This is especially true as the City of Canal Winchester is experiencing financial constraints through 2021.

Gender Road is designated in the City of Columbus Southeast Regional (Community) Plan, as a key roadway (for) improvement. Improvements planned for this project are consistent with this vision.

The project corridor has seen rapid growth in ADT in the last 6 years, increasing from 26,422 to 32,780 vehicles per day, which far exceeds the anticipated growth rate from the 2013 traffic study (excerpts attached, complete report available on request).

Traffic is expected to grow further with the growth of the Brew Dog facility on Gender Road, south of the project limits. This critical facility employs 125 people and produces 852,000 barrels of beer at full capacity. The facility also includes and on site destination hotel "The DogHouse" which was recently named one to the "100 Greatest Places on Earth" by Time Magazine in 2019. The development of this facility has received tremendous support through the local and state level as its economic importance to the region is easily recognized. See the attached article from the Columbus Dispatch from August 27, 2019

The project will maintain accommodation for bicyclists through use of a multi-use path, which is consistent with the MORPC Regional Bikeway plan.

As discussed above, the Project improvements will achieve a public benefit that is specifically aligned with improvements deemed warranted in a previous traffic impact study prepared to support the development of the nearby Elementary School Campus. The development of the Canal Winchester Elementary Schools south of the project site contributes to the additional demand at the intersection.

A12) ABILITY & EFFORT TO FINANCE THE PROJECT (Weight: SCIP= 2; LTIP = 2)

Is the unfunded project cost more than 50% of the subdivision’s total general fund plus any other funds that can be used for this type of infrastructure? The **unfunded project cost** is the total project cost less any Other Match sources in Criterion S2 (federal, state, private, etc.).

To receive credit, the applicant is required to submit a copy of the subdivision’s Annual Tax Budget for the year commencing January 1, 2020. ORC 5705.28 asks subdivisions to submit these budgets to the Franklin County Auditor's office in July 2019. The applicant must highlight or mark the portions of the budget eligible to fund this project.

For an application in which more than one subdivision is contributing to the Applicant Match, submit the Annual Tax Budget for the subdivision making the largest contribution to the project.

| Check If Documented | Percentage of Subdivision’s Total Funds for the Infrastructure Type | Points |
|---------------------|---|--------|
| X | Unfunded project cost represents less than 50% of subdivision's total annual funding that can be used for this project. | 0 |
| | Unfunded project cost represents 50% to 100% of subdivision's total annual funding that can be used for this project. | 3 |
| | Unfunded project cost represents more than 100% of subdivision's total annual funding that can be used for this project. | 5 |

A13) SPECIAL TAX OR FEE (Weight: SCIP= 3; LTIP = 3)

Complete the chart below to show any taxes, fees, or funding mechanisms devoted to local public infrastructure eligible for SCIP or LTIP. The revenue source does not have to be directly related to the project in the application. Documentation (e.g. legislation) is required for any specific tax or fee, with the exception of the optional motor vehicle license fee.

| Check If Documented | Special Tax or Fee |
|----------------------------------|---------------------------------------|
| | Optional motor vehicle license fee |
| X (See attached Ordinance 42-07) | Storm water management fee |
| X (See attached TIF agreement) | Tax Increment Financing (TIF) Revenue |
| | Other (specify): |

The purpose of this question is to determine the level of effort the applicant has made to fund its infrastructure by enacting a special tax or fee to improve its infrastructure.

Scoring:

3 points for one item

5 points for two or more items

A14) PEDESTRIAN, BICYCLE & TRANSIT ACCOMMODATION (Weight: SCIP = 2; LTIP = 2)

Does the proposed project provide pedestrian, bicycle and transit accommodations as appropriate based on the type of roadway and current/future land use in the project area? When designing accommodations for all users of the transportation system, it is important to ensure safety, ease of use, and ease of transfer between modes.

Information about Complete Streets and a toolkit that contains information on different roadway scenarios that accommodate all user is available at: <http://www.morpc.org/tool-resource/complete-streets/>. Applicants are encouraged to contact MORPC for assistance in designing their project.

| Check If Applicable | Proposed Accommodations | Points |
|---------------------|--|--------|
| X | Includes appropriate pedestrian, bicycle and/or transit accommodations in the project or already exist throughout the project area | 5 |
| | Does not provide appropriate pedestrian, bicycle or transit accommodations | 0 |

The project includes an off-road shared-use bike & pedestrian facility and is thus consistent with the MORPC planning documents.

A15) JOINT FINANCIAL PARTNERSHIPS (Weight: SCIP = 1; LTIP = 1)

Is this a joint financial partnership where another agency provides **at least 10% of the required local match or 1% of the total project cost (whichever is higher)** as part of the local share? Funds provided by federal or state agencies are not included.

A letter documenting financial commitment between the agencies must be included in Supportive Documentation. Eligible participating local entities are all political and taxing jurisdictions in Franklin County including schools, libraries, SWACO, etc.

| Check If Documented | Participating Local Entity | Match Provided |
|---------------------|----------------------------|----------------|
| N/A | | |
| | | |
| | | |

The score will be determined by the criteria below. All partnerships must meet minimum criteria above to be considered for scoring.

| Type of Partnership | Points |
|--|--------|
| 1 entity is partnering with applicant, providing less than 20% of the total project cost | 3 |
| 1 entity is partnering with applicant, providing more than 20% of the total project cost | 5 |
| 2 or more entities are partnering with applicant | 5 |

STAFF EVALUATION CRITERIA – Round 34

Instructions: Read each criterion carefully and respond, if necessary, as directed. Most Staff Evaluation Criteria are scored using information entered into the Ohio Public Works Commission Application for Financial Assistance and the Applicant Evaluation Criteria. The **RESPONSE** prompts indicate places where the applicant is expected to provide information. The other criteria are provided here to inform the applicant of the scoring methodology.

Staff will review the information contained in the Round 34 application to score each of the questions outlined below.

Each question (S1- S12) is worth between 0-5 points (raw score). Final score for each question is determined by multiplying the raw score times the weight for each question.

The Overmatch is the portion of the match that exceeds the Required Minimum Match. Applications that provide an Overmatch earn points for S1 or S2, depending on the source of the match.

Funds from other sources are weighted more heavily than those from the applicant because: the applicant is leveraging OPWC funds, thereby using all available resources; because it demonstrates that another agency has seen enough merit in the applicant's project to commit funding to it; and the OPWC assistance may prevent the loss of the other funds to the district, if the applicant could not otherwise find enough funding to proceed with the project.

APPLICANT MATCH – (Weight: SCIP =2; LTIP = 2)

S1) Is the applicant or other responsible local public agency putting more than the required minimum into the project?

The Applicant Match is the total local revenues committed to the project by the applicant and any other local agencies that have the responsibility to maintain a portion of the project. It includes:

- Any funds from another local entity, if it has any maintenance responsibility for the project.
- Tax increment fund (TIF) revenues.
- Permissive license fee revenues, county motor vehicle license tax revenues, or any other funds held by the Franklin County Engineer that are earmarked for a specific local agency.
- Any funds under control of the applicant or other local agencies that have any responsibility to maintain a portion of the project.
- The portion of funds from a Special Improvement District (SID) that were paid by the applicant.

RESPONSE: Enter the Applicant Match information.

| Local Subdivision with Maintenance Responsibility | Cash Contribution | In-Kind or Force Account Contribution |
|---|-------------------|---------------------------------------|
| Applicant | \$199,960 | |
| Other: | | |
| Other: | | |
| Other: | | |
| Total | \$199,960 | |

The Applicant Match does not include federal, state, or private sources or any other sources included in Other Match (Criterion S2).

The City of Canal Winchester is requesting \$750,000 as an OPWC SCIP Loan for the project (75% of the total funds requested).

SCIP

The Required Minimum Match for SCIP assistance is 10 percent of the repair/replacement portion of the project cost and 50 percent of the new/expansion portion of the project cost.

For SCIP scoring, the SCIP Applicant Match is the sum of the Applicant Match and the SCIP loan requested on the application.

The Applicant Overmatch is the percentage of SCIP Applicant Match minus the percentage Required Minimum Match.

(Applicant does not need to fill in this table. Staff will perform calculations.)

SCIP Applicant Match: _____ % (Local Public Agency Funds + SCIP Loan Request)
 Required Minimum Match: _____ % (10% for repair/replace & 50% for new/expansion)
 Applicant Overmatch (if > 0)
 OR
 Unmet Minimum Match (if < 0) _____ % (SCIP Applicant Match - Required Minimum Match)

If the SCIP Applicant Match is less than the Required Minimum Match, there is unmet minimum match, which must be met with Other Match (S2). The Applicant Overmatch becomes the Unmet Minimum Match in S2.

LTIP

There is no Required Minimum Match for LTIP grants. Therefore, the Applicant Overmatch is equal to the Applicant Match.

Points for SCIP and LTIP are awarded on the size of the Applicant Overmatch.

| Applicant Overmatch (%) | | | earns | Points |
|-------------------------|-----|-----------------------|-------|--------|
| Greater than | and | Less than or equal to | | |
| — | ≤ | 5% | | 0 |
| > 5% | ≤ | 15% | | 1 |
| > 15% | ≤ | 25% | | 2 |
| > 25% | ≤ | 35% | | 3 |
| > 35% | ≤ | 45% | | 4 |
| > 45% | | — | | 5 |

Documentation Required

If any agencies, other than the applicant, that have any responsibility to maintain a portion of the project are contributing to the Applicant Match, the applicant must provide a letter of commitment or intent from the entity providing the funds.

OTHER MATCH – (Weight: SCIP = 4; LTIP = 8).

S2) What other funds (federal, state, private) will be utilized in the project's undertaking?

Other Match contributions come from sources that are not under the control of the applicant and **not** from agencies with maintenance responsibility for a portion of the project. Applications that attract Other Match and that provide an Overmatch earn points. The Required Minimum Match is first counted against the Applicant Match (S1). Sources of Other Match may include:

- State, federal, or other public sources.
- Private contributions, such as from a developer.
- County Engineer contributions, if the county has no maintenance responsibility for any portion of the project.
- Portion of Special Improvement District (SID) that were not paid by the applicant.

RESPONSE: Enter the Other Match information below.

| Other Match Contributor | Revenue Contribution | Value of In-Kind Contribution |
|-------------------------|----------------------|-------------------------------|
| Not Applicable | \$0 | |
| | | |
| | | |
| | | |
| Total | \$0 | |

The Other Match does not include fund from the applicant or any other sources included in Applicant Match (Criterion S1).

SCIP

There is a Required Minimum Match for SCIP Assistance, which was determined for S1. To determine the Other Overmatch, the Other Match must be reduced by any Unmet Minimum Match, also determined in S1.

(Applicant does not need to fill in this table. Staff will perform calculations.)

Other Match: _____ %
Unmet Minimum Match (if any): _____ % From S1, must be < 0.
Other Overmatch: _____ % (Other Match + Unmet Minimum Match)

LTIP

There is no Required Minimum Match for LTIP grants. Therefore, the Other Overmatch is equal to the Other Match.

Points for SCIP and LTIP are awarded on the size of the Other Overmatch.

| Other Overmatch (%) | | | | |
|---------------------|-----|-----------------------|-------|--------|
| Greater than | and | Less than or equal to | earns | Points |
| — | ≤ | 5% | | 0 |
| > 5% | ≤ | 15% | | 1 |
| > 15% | ≤ | 25% | | 2 |
| > 25% | ≤ | 35% | | 3 |
| > 35% | ≤ | 45% | | 4 |
| > 45% | | — | | 5 |

Documentation Required

The applicant must provide a letter of commitment or intent from any entities contributing to the Other Match.

SCIP LOAN REQUEST – (Weight: SCIP= 8; LTIP =0)

S3) What portion of the total SCIP assistance requested is in the form of a loan or loan assistance?

The City of Canal Winchester is requesting 75% of the total OPWC Funds as a Loan.

The following points will be awarded as long as the SCIP loan requested is no less than \$50,000 OR the applicant requests 100% of their assistance in the form of a loan or loan assistance, whichever is less:

| Loan Portion of Request | | | | |
|-------------------------|-----|-----------------------|-------|--------|
| Greater than | and | Less than or equal to | earns | Points |
| — | ≤ | 10% | | 0 |
| > 10% | ≤ | 25% | | 1 |
| > 25% | ≤ | 75% | | 3 |
| > 75% | ≤ | 100% | | 5 |

APPLICANT’S ECONOMIC CONDITION – (Weight: SCIP= 5; LTIP = 0)

S4) What is the subdivision’s per capita income?

(See staff look up table.)

Agencies with fewer resources available to them earn more points than agencies with more resources. In practice, the community’s per capita income is used as a surrogate for its financial health. Per capita income is taken from census data and cannot be directly affected by the applicant.

USEFUL LIFE – (Weight: SCIP = 0; LTIP = 1)

S5) What is the project’s composite useful life?

Use the Design Service Capacity & Useful Life Worksheet to determine the weighted useful life of the project. Staff will use the following table to score the useful life.

| Useful Life (Years) | | | | |
|---------------------|-----|-----------------------|-------|--------|
| Greater than | and | Less than or equal to | earns | Points |
| 7 | ≤ | 10 | | 1 |
| 10 | ≤ | 20 | | 2 |
| 20 | ≤ | 30 | | 3 |
| 30 | ≤ | 40 | | 4 |
| 40 | | — | | 5 |

If the useful life of any component exceeds the typical useful life outlined in the worksheet instructions, please explain in the response below, and provide any Supportive Documentation if necessary.

RESPONSE:

The Project Composite Useful Life is 20.78 Years. See the preceding Useful Life Calculations.

OLDER LAND-LOCKED SUBURBS (Weight: SCIP= 1; LTIP = 1)

S6) Is this project within an older land locked suburb and only repairing or replacing aging infrastructure?

| | <u>Points</u> |
|-----|---------------|
| Yes | 5 |
| No | 0 |

To receive credit, the following conditions must be met:

1. The project is within the corporate boundary of an “older land locked suburb,” that is, a municipal corporation with a boundary that has been primarily fixed for at least 30 years and for which no substantial opportunity exists for further expansion. These municipalities are listed below:

| | |
|-------------------|-----------------|
| Bexley | Riverlea |
| Brice | Valleyview |
| Grandview Heights | Whitehall |
| Marble Cliff | Worthington |
| Minerva Park | Upper Arlington |

2. The costs of the proposed project are 100% for the repair or replacement of infrastructure as certified on the Design Service Capacity & Useful Life Certification.

LAST ROUND FUNDED – (Weight: SCIP = 1; LTIP = 1)

S7) In what round did the applicant last receive any form of OPWC funding: SCIP; LTIP; or the Small Government Commission?

Staff will use OPWC records to determine the last round in which the applicant received OPWC assistance and determine the number of years that have since elapsed.

| Years Since Last OPWC Award | Points |
|------------------------------------|---------------|
| 1 to 2 | 0 |
| 2 to 4 | 1 |
| 5 to 6 | 3 |
| 7 or more | 5 |

PERCENT NEW/EXPANSION – (Weight: SCIP= 2; LTIP =0)

S8) What percent of this project is new or expansion?

Staff will use the Design Service Capacity & Useful Life Worksheet to determine the percentage of the project that is for new infrastructure or expansion of existing infrastructure.

| Expansion (%) | | Less than or equal to | earns | Points |
|-----------------|-----|--------------------------|-------|--------|
| Greater than | and | | | |
| — | ≤ | 0% | | 5 |
| > 0% | ≤ | 25% | | 4 |
| > 25% | ≤ | 50% | | 3 |
| > 50% | ≤ | 75% | | 2 |
| > 75% | ≤ | 90% | | 1 |
| > 90% | | — | | 0 |

PERCENT ROAD, BRIDGE, OR STORM DRAINAGE – (Weight: SCIP= 2; LTIP = 0)

S9) What percent of this project is for road, bridge, or storm drainage infrastructure?

Staff will use the Design Service Capacity & Useful Life Worksheet to determine the percentage and calculate the score.

(Applicant does not need to fill in this table. Staff will perform calculations.)

_____ % × 5 = _____ points

The District 3 Committee emphasizes the use of SCIP funds for projects that do not have a direct relationship with a user fee collection. In the SCIP program, projects with higher proportions of road, bridge, or storm drainage components earn more points.

CONSTRUCTION START – (Weight: SCIP=1; LTIP=1)

S10) Is the project construction start date on or before March 31, 2021, and does the applicant have fewer than two delinquent projects from earlier rounds?

It is important that projects start construction within the program year. To encourage projects to meet this requirement, projects scheduled to begin construction by March 31 of the program year are eligible to receive points. The applicant provides the Construction Begin Date in Item 3.3 of the OPWC application form.

Local agencies are also encouraged to complete construction and close out projects with OPWC without undue delay, because any unused project funds will become available for current applications.

Projects that do not begin construction and close out in a timely fashion are considered delinquent. A project is delinquent when any of the following conditions are met:

- Projects awarded assistance in Round 32 or earlier that have not started construction by June 1, 2019. Staff will contact applicants to obtain the construction status of their projects by June 30.
- Projects awarded assistance in Round 29 or earlier that have not been closed out with OPWC by June 30, 2019. “Closed out” means final disbursement has been requested and the appropriate paperwork has been submitted to OPWC to close this project.

If the project construction start date is on or before March 31, 2021, then points will be awarded as follows:

| Number of Delinquent Projects | Points |
|-------------------------------|--------|
| 0 | 5 |
| 1 | 3 |
| 2 or more | 0 |

Applicants with delinquent projects based on information on record with OPWC will be notified by July 31, 2019.

TOWNSHIP – (Weight: SCIP = 0; LTIP = 2)

S11) Is the applicant a township?

| | Points |
|-----|--------|
| Yes | 5 |
| No | 0 |

Because the District Committee has difficulty in reaching its statutory goal for providing a certain portion of the LTIP funding to townships, bonus points are awarded to township applicants under the LTIP program.

PORTION OF OPWC FUNDS REQUESTED – (Weight: SCIP = 2; LTIP = 1)

S12) What is the total amount of OPWC assistance requested?

| Total SCIP Assistance Requested | | | | |
|--|-----|-----------------------|-------|--------|
| Greater than | and | Less than or equal to | earns | Points |
| — | ≤ | \$1,000,000 | | 5 |
| > \$1,000,000 | ≤ | \$2,000,000 | | 3 |
| > \$2,000,000 | ≤ | \$5,000,000 | | 1 |
| > \$5,000,000 | ≤ | — | | 0 |

| LTIP Grant Requested | | | | |
|-----------------------------|-----|-----------------------|-------|--------|
| Greater than | and | Less than or equal to | Earns | Points |
| — | ≤ | \$1,000,000 | | 5 |
| > \$1,000,000 | ≤ | \$3,500,000 | | 3 |
| > \$3,500,000 | ≤ | — | | 0 |

Subject: Gender Road Phase 5 Improvements
Crash Data and Crash Modification Factors (CMFs)

Copies: File

We have summarized and examined crash data occurring on Goodale Boulevard between Yard Street and Edgeworth Street for the three-year period between January 2016 and December 2018. The crash data were retrieved from ODOT GIS Crash Analysis Tool and summarized in Crash Analysis Module (CAM Tool) as attached. Summary page of the CAM tool is attached. **Table 1** shows the summary of this crash data based on crash type. There are twenty (100) non-animal related crashes. Out of the 100 reported crashes, there are 40 rear-end crashes, 25 left turn crashes, 12 sideswipe crashes, and 10 angle crashes. Summary pages of the CAM tool are attached.

Table 1 - Crash Summary based on Type of Crash

| TYPE OF CRASH | Number | % |
|---------------------|------------|---------------|
| Rear End | 40 | 40.0% |
| Left Turn | 25 | 25.0% |
| Sideswipe - Passing | 12 | 12.0% |
| Angle | 10 | 10.0% |
| Right Turn | 4 | 4.0% |
| Head On | 3 | 3.0% |
| Backing | 3 | 3.0% |
| Fixed Object | 2 | 2.0% |
| Overturning | 1 | 1.0% |
| Grand Total | 100 | 100.0% |

The proposed improvements for Gender Road is to construct exclusive northbound right turn lanes on Canal Street and Winchester Boulevard. See attached exhibits

Various traffic safety studies conducted around the country over the years have quantified the crash reduction potential of roadway improvements. The [Crash Modification Factors Clearinghouse](#) web-based

Gender Road Phase 5

Crash Data and Crash Modification Factors (CMFs)

database of FHWA compiles the crash modification factors (CMFs) generated from these studies. A search of the CMF database indicated two CMFs related to the subject improvement will have potential to reduce crashes in the area. CMF ID number 288 is to provide a right turn lane on one major road approach. Its CMF value is 0.91 and can be applied to all crash types and all crash severity. The detail description of the CMF is attached.

The application of the above CMF due to the proposed improvements. There is potential to reduce future expected crashes. The quantified number of crashes will be expected to be reduced can be analyzed with ODOT Economic Crash Analysis Tool (ECAT).

CMF / CRF Details

CMF ID: 288

Provide a right-turn lane on one major-road approach

Description:

Prior Condition: *No Prior Condition(s)*

Category: Intersection geometry

Study: [Safety Effectiveness of Intersection Left- and Right-Turn Lanes, Harwood et al., 2002](#)

Star Quality Rating: ★★★★★

Crash Modification Factor (CMF)

Value: 0.91

Adjusted Standard Error: 0.04

Unadjusted Standard Error: 0.03

Crash Reduction Factor (CRF)

Value: 9 *(This value indicates a **decrease** in crashes)*

Adjusted Standard Error: 4

Unadjusted Standard Error: 3

Applicability

Crash Type: All

Crash Severity: K (fatal),A (serious injury),B (minor injury),C (possible injury)

Roadway Types: Not Specified

Re: Gender Road Improvements, Phase V, City of Canal Winchester

Dear Esteemed Members of the Public Works Integrating Committee:

This letter signifies my support of the Gender Rd. Improvement, Phase V project, for which the City of Canal Winchester is seeking financial assistance from the Ohio Public Works Commission. This project includes critical improvements to the intersections of Gender Rd./Canal St., and Gender Rd./Winchester Blvd. intersections that will positively affect our facilities and operations. As the Chief of the Madison Township Fire Department, I am well aware of the congestion issues at these intersections and the safety concerns related to traffic congestion. These issues directly affect the operational aspects of the Madison Township Fire Station 182, which is directly south of these intersections.

I understand as part of the project additional turn lanes and optimization of the traffic signal will mitigate much of the congestion issues and improve safety in the area. These improvements are necessary from an operational standpoint of the Fire Department as the majority of the emergency calls require us to travel north on Gender Rd. through these intersections. These improvements will reduce congestion and thus reduce response times for our emergency equipment.

Once again, the Madison Township Fire Department fully supports the efforts of the City of Canal Winchester to make necessary improvements proposed in the application. I trust the application will receive due consideration from the District Three Public Works Integrating Committee and will be selected for funding assistance based on its merits. If you have any questions or would like to discuss the matter further, please do not hesitate to contact me at 614-837-7883.

Sincerely,

Jeff Fasone
Fire Chief

July 29, 2019

Mr. Matt Peoples
Director of Public Service
City of Canal Winchester
36 South High Street
Canal Winchester, Ohio 43110

Subject: Gender Road Phase 5
Traffic Analysis

Dear Mr. Peoples,

EMH&T has been commissioned by City of Canal Winchester to prepare conceptual engineering and funding evaluation on Gender Road corridor with the addition of northbound right turn lanes. This report is the summary of the traffic data collection and capacity analysis.

Study Area

Four intersections along Gender Road are included in this analysis. They are listed below and also shown in **Figure 1**.

- Gender Road/US-33 Eastbound Ramp
- Gender Road/Waterloo Street
- Gender Road/Winchester Boulevard
- Gender Road/Canal Street

Data Collection

Turning movement counts were conducted at the Gender Road/US-33 Eastbound Ramp at the hours of 7am-9am and 4pm-6pm on Wednesday July 17, 2019. Other recent count data (2018) used in this analysis were obtained from the *Canal Winchester Warehouse TIS* done by Carpenter Marty Transportation dated November 9, 2018. A copy of the count data is attached.

Future Traffic Volume Projections

The future traffic volumes consist of future background traffic volumes plus the traffic expected from known planned developments in the surrounding area. For the purpose of this analysis, it was assumed the design year is 2042. In order to forecast 2042 background traffic volumes, a 1.7% linear growth rate was applied to the study area intersections. This growth rate was used in the Winchester Boulevard Access Management Plan and subsequently applied in *Canal Winchester Warehouse TIS*.

The trips generated by approved developments in the area are acquired from the *Canal Winchester Warehouse TIS* and the *Crossroads Church TIS* prepared by Smart Services dated April 2016. A copy of the volume calculation is attached.

Figure 1 – Study Area

Turn Lane Length Calculations

Turn lane lengths were calculated for the proposed northbound turn lanes based on procedures in accordance with the *Location and Design Manual, Volume 1* (Ohio Department of Transportation, 2019). The speed limit on Gender Road in the study area is 35 mph. Both 35 mph and 40 mph design speeds were utilized in the calculation of turn lane lengths. The results of the northbound turn lane sizing is shown in **Table 1**. At the Gender Road/US33 Eastbound Ramp intersection, the no blocking distance for the northbound right turn lane will extend past the Winchester Boulevard. It is recommended that this turn lane be installed between US33 Eastbound Ramp stop line to just north of Winchester Boulevard, with a resulting length of this turn lane is approximately 945 feet. A copy of the calculation is attached.

Table 1 – Turn Lane Length for an Exclusive Northbound Right Turn Lane

| Intersection | Design Speed (mph) | Calculated Length | No Block Length | Recommended Length |
|----------------------|--------------------|-------------------|-----------------|--------------------|
| US-33 Eastbound Ramp | 35 | 575 | 1175 | 945 |
| | 40 | 640' | 1175' | 945' |
| Winchester Boulevard | 35 | 225 | 650 | 650 |
| | 40 | 290' | 650' | 650' |
| Canal Street | 35 | 325 | 675 | 675 |
| | 40 | 390' | 675' | 675' |

All lengths include a 50-foot diverging taper.

Intersection Capacity Analysis

Synchro 10 software was used to evaluate operational characteristics of study area intersections based on design year 2042 weekday morning and afternoon peak hour traffic volume conditions. Two geometric conditions are analyzed to show what impact will be made due to the construction of a northbound right turn lane. The two geometric conditions are no-build (current lane configuration) and build (the addition of a northbound right turn lane). The results of the analysis is summarized in **Table 2**. The overall intersection delay will be improved/reduced during both AM and PM peak hours after the proposed northbound right turn lanes are in place.

Table 2 – Summary of Capacity Analysis

| Time Period | Scenario | EBLT | EBTH | EBRT | WBLT | WBTH | WBRT | NBLT | NBTH | NBRT | SBLT | SBTH | SBRT | TOTAL |
|---|----------|---------|---------|--------|---------|--------|---------|---------|---------|---------|---------|--------|--------|---------|
| Gender Road/US33 Eastbound Ramp | | | | | | | | | | | | | | |

X/X = Overall LOS / Average Delay Per Vehicle
 No Build: Current Lanes, Build: Addition of a northbound right turn lane

We also reviewed the measures of effectiveness for the whole study area by total delay and fuel consumption as summarized in **Table 3**. The total delay for the study area will be decrease by 6% and 34% during AM and PM peak hour, respectively. The fuel consumption will be decreased by 3% and 22% during AM and PM peak hour, respectively. The reduction of delay and fuel consumption during PM peak hour is significant due to the addition of northbound right turn lanes at the study intersections. A copy of the Synchro capacity analysis output is attached.

If there is any question or comment, please feel free to let me know.

Table 3 – Network Measures of Effectiveness

| Scenario | Total Delay (hr) | Fuel Consumed (gal) |
|------------------|------------------|---------------------|
| 2042 AM No Build | 67 | 167 |
| 2042 AM Build | 63 | 162 |
| 2042 PM No Build | 348 | 421 |
| 2042 PM Build | 228 | 329 |

Sincerely,

Charles Wu, PE
Traffic Engineer

IV. Projected Traffic

A. Background Traffic

For analysis, the Opening Year of the development is 2020 and the Design or Horizon Year is 2030. In order to project the count data to the Opening and Horizon Years, growth rates were researched from previous studies completed in Canal Winchester. The highest growth rate was used in order to produce conservative results. A linear, annual growth rate of 1.7% was obtained from a traffic study with the subject line *Winchester Boulevard Access Management Plan - Proposed Traffic Signal - Winchester Boulevard @ Prentiss School Road/Winchester Square Drive* provided by Canal Winchester. This growth rate was applied to the 2018 count data to produce Background traffic for the Opening and Horizon Years. Additional traffic for the proposed Winchester Office Park was also added to the grown Background traffic to produce No Build traffic for the Opening and Horizon Years. The Winchester Office park is proposed to be constructed on the south side of Winchester Boulevard opposite of the proposed development. The above referenced traffic study can be found in **Appendix B**.

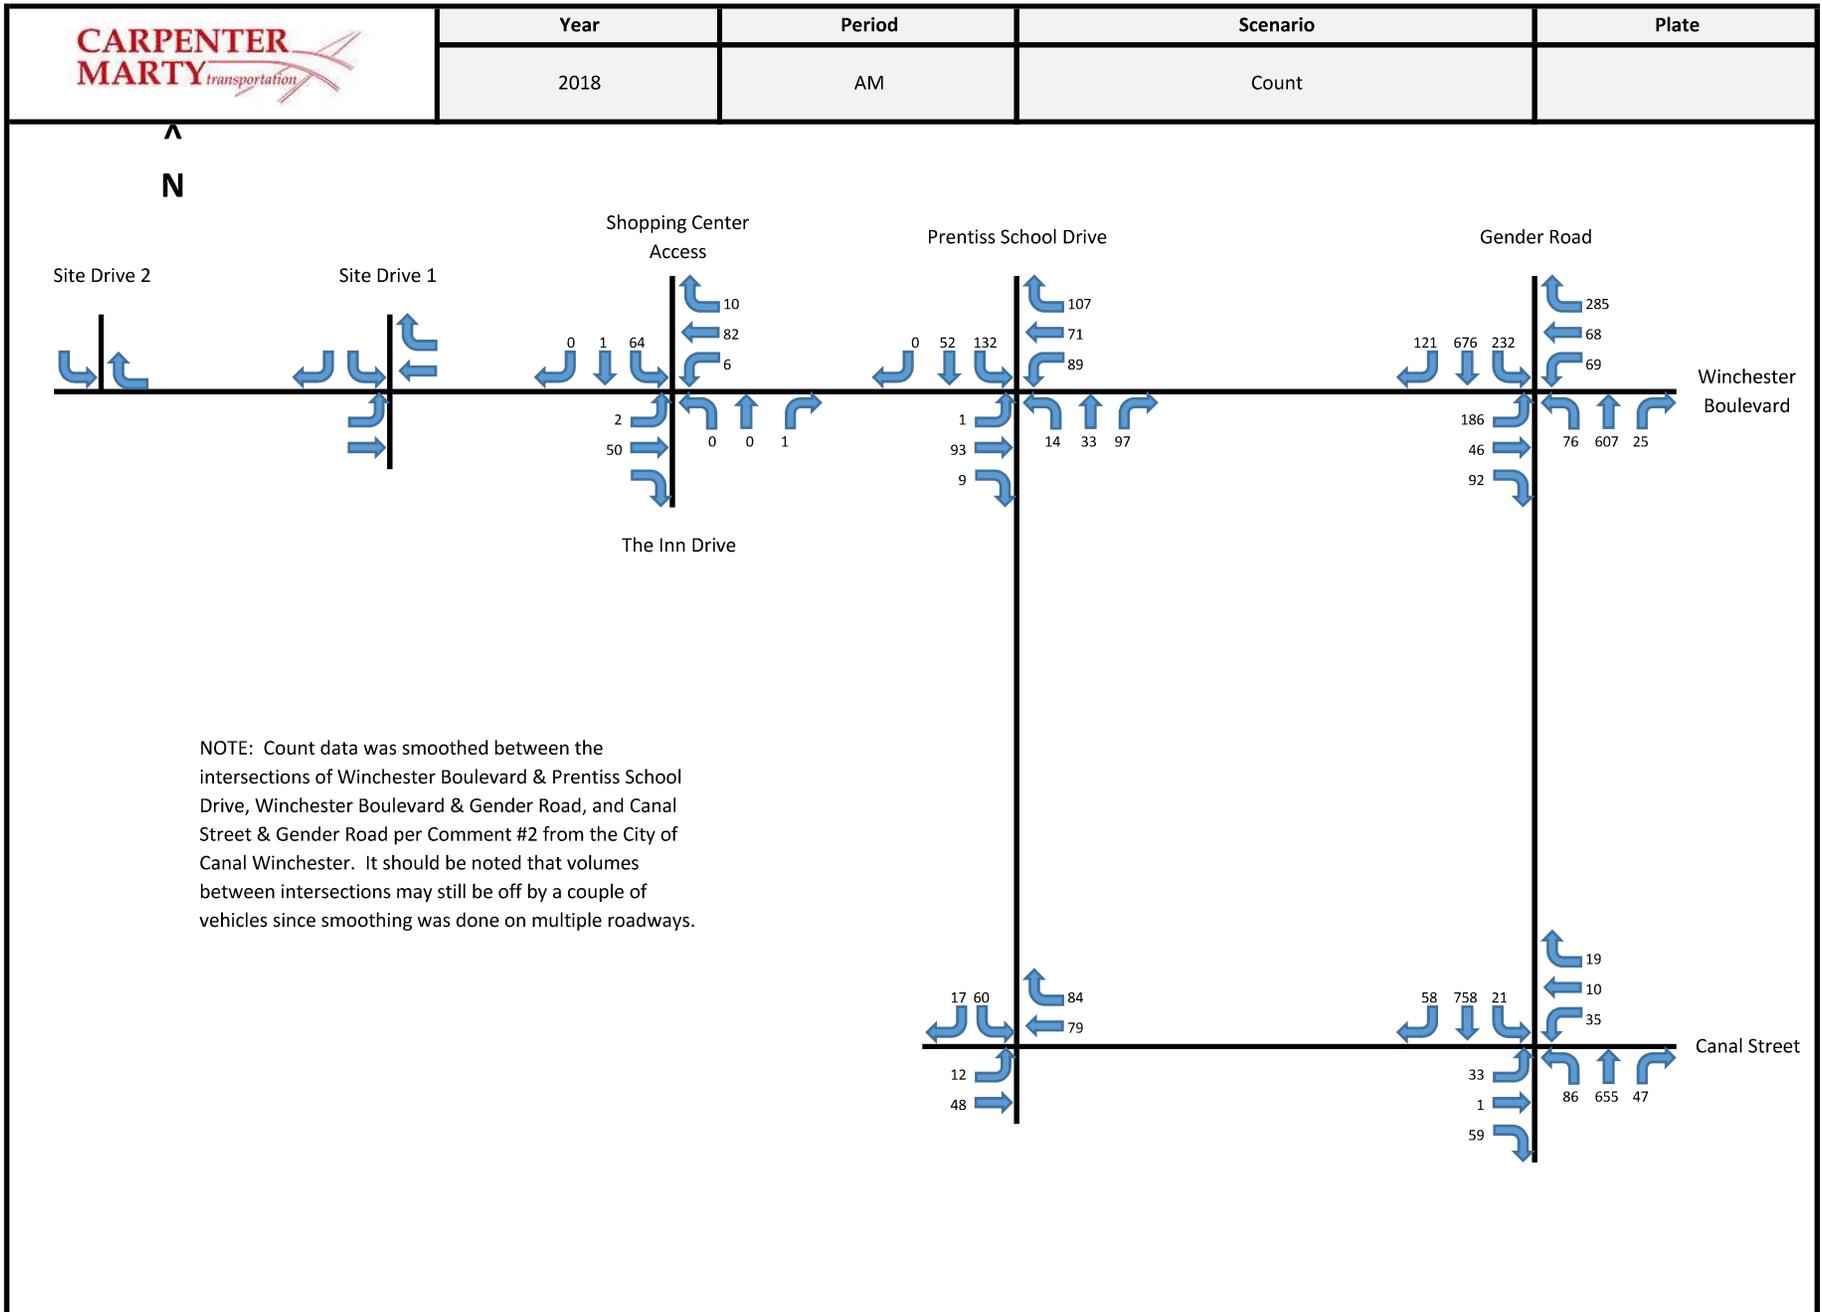

B. Site Traffic

Trips for the proposed development and background Winchester Office Park were generated using standard Institute of Transportation Engineers (ITE) practices and the *Trip Generation Manual*, 10th edition, data via the OTISS program². Land Use Codes (*LUC*) 150 – Warehousing, 710 – General Office Building, and 310 – Hotel were used to generate trips for the proposed development and the Winchester Office Park. *LUC 150 - Warehousing* was determined to be the best land use code for the proposed development based on the ITE description. The development is expected to be 90-95% warehousing storage and distribution space with 5-10% office space. After further review, the most likely use for the site would be *LUC 154 - High-Cube Transload and Short-Term Storage Warehouse*. This LUC generates approximately 30% less trips than *LUC 150 - Warehousing*. The *LUC 150 - Warehousing* was maintained for this TIS as the end users of the proposed site are unknown. Based on this information, the results of this TIS are expected to be conservative. Internal capture and pass-by do not apply to the proposed development or the Winchester Office Park. **Table 1** shows the trip generation of the proposed development. **Table 2** shows the trip generation for the Winchester Office Park. The full trip generation analysis and LUC descriptions can be found in **Appendix C**.

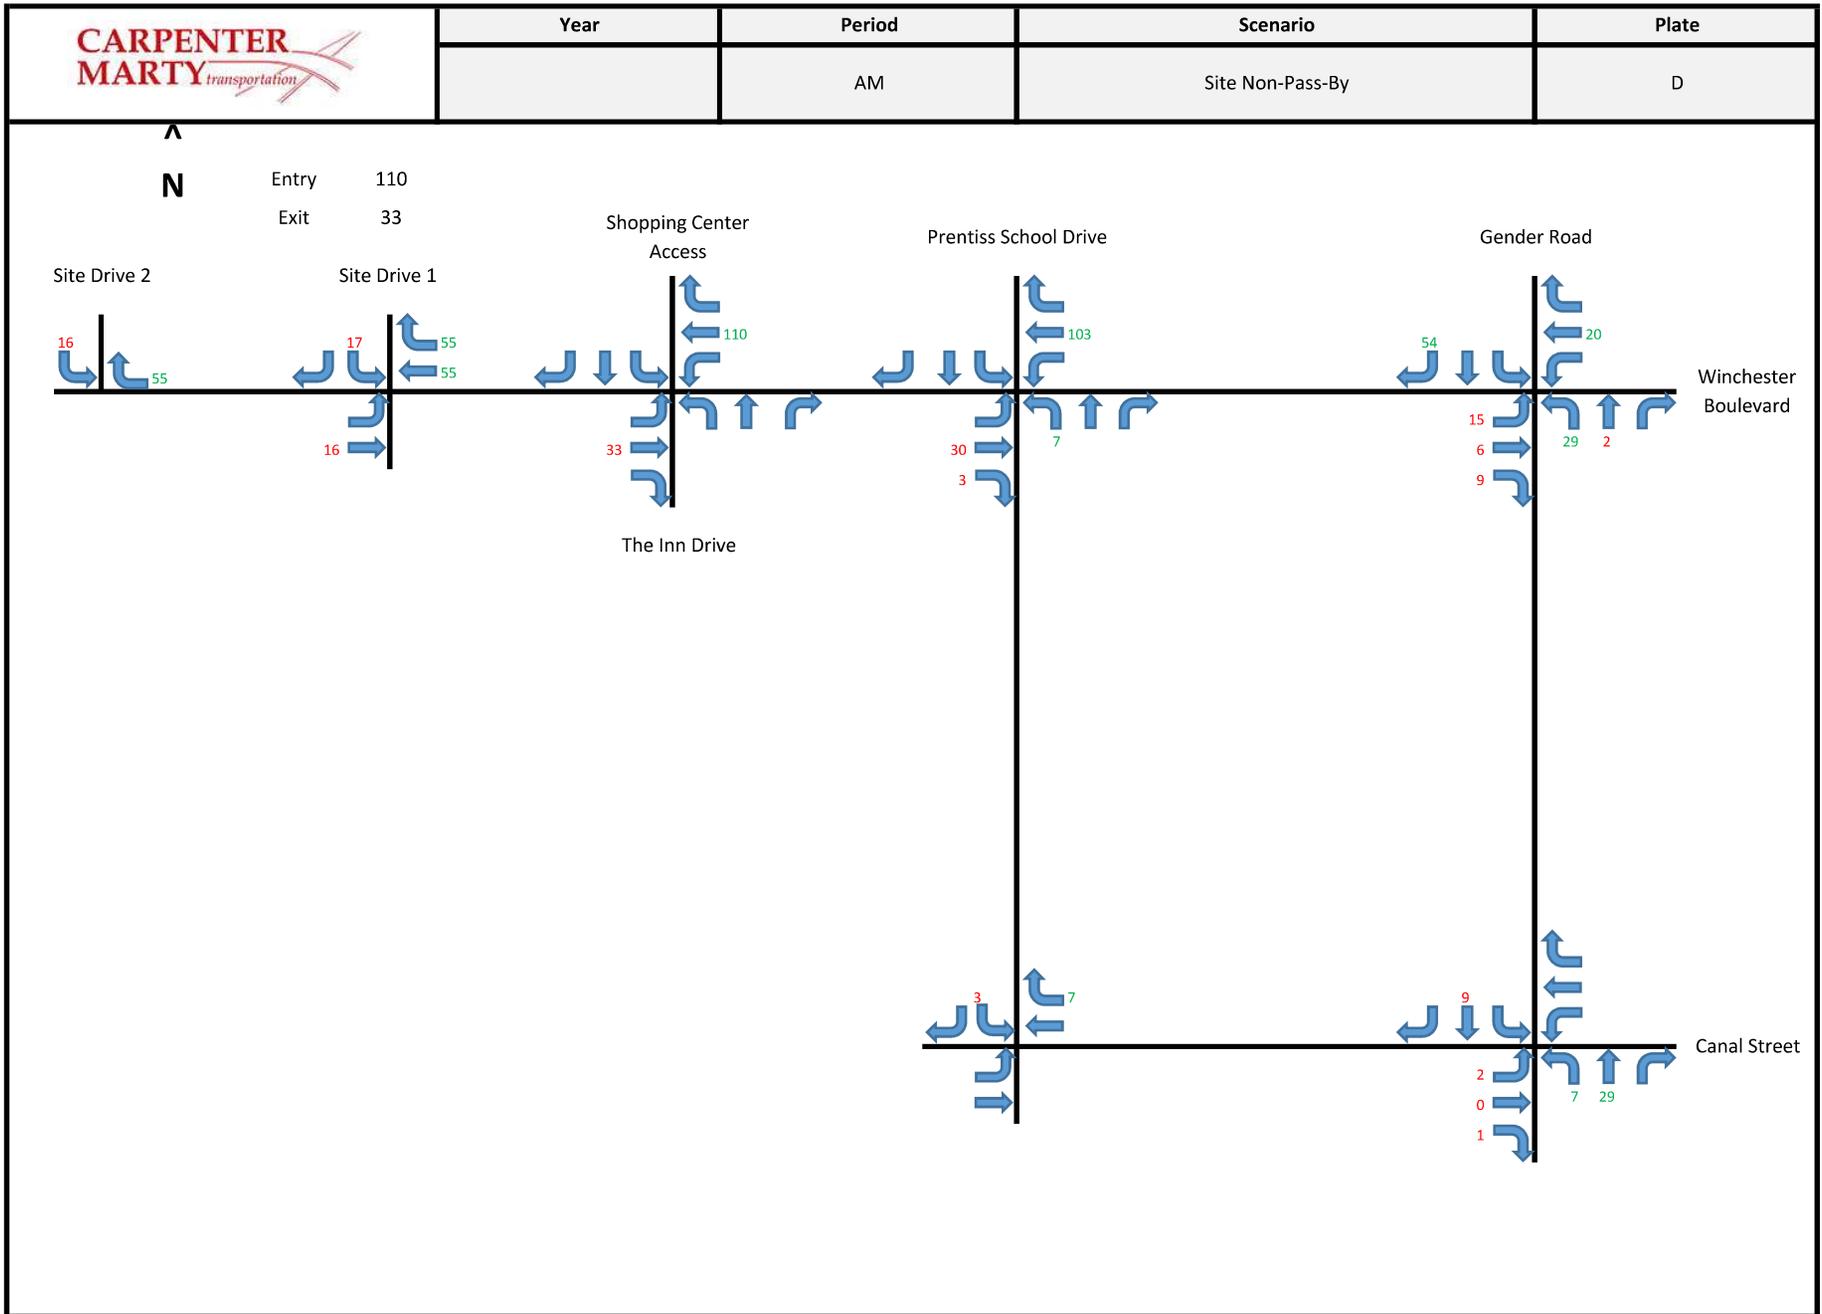

Trips generated by this proposed development are anticipated to be mostly standard passenger vehicles for persons who are traveling to and from work daily. It is also anticipated that there will be a slight increase in truck traffic during peak hours. However, most truck pickups and deliveries take place outside of peak traffic hours for efficiency. Warehousing/light manufacturing developments are becoming more modernized, requiring less employees for day-to-day operations and thus, generating less vehicle trips. Based on conversations with the City of Canal Winchester, it was assumed that 20% of the generated traffic for the proposed site would be trucks. Schematics of anticipated design vehicles associated with the proposed site entering and exiting Winchester Boulevard from Gender Road are provided in **Appendix D** per the request of the City.

| 16 | 550 | 60 | 1850 |

$$* \text{ AVERAGE VEHICLES PER CYCLE} = \frac{\text{DHV (TURNING LANE)}}{\text{CYCLES/HOUR}}$$

IF CYCLES ARE UNKNOWN ASSUME:

UNSIGNALIZED OR 2 PHASE = 60 CYCLES/HOUR

3 PHASE = 40 CYCLES/HOUR

4 PHASE = 30 CYCLES/HOUR

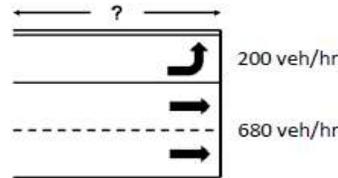

October 2004

Example - Turn Lane Design Using Figures 401-9 and 401-10

Problem

Calculate the length of an exclusive left turn lane.

Traffic Control: **Signalized**
 Design Speed: **55 mph**
 Cycle Length: **90 sec**

Determine Storage and Turn Lane Lengths

$$\text{Turn Lane Demand (High/Low)} = \frac{200 \text{ veh/hr}}{200 \text{ veh/hr} + 680 \text{ veh/hr}} = 23\% = \text{High Demand}$$

Refer to the matrix in **Figure 401-9**.

For Signalized, 55 mph, High Demand, use Method B or C, whichever is greater.

Method B – For 55 mph, a 285' turn lane length is required (235' storage + 50' taper).

Method C – For 55 mph, 165' + calculated storage length in **Figure 401-10**.

$$\text{Average Vehicles per Cycle} = \frac{(200 \text{ veh/hr}) * (90 \text{ sec/cyc})}{3600 \text{ sec/hr}} = 5 \text{ veh/cyc} \rightarrow 200'$$

$$\text{Total Length} = 165' + 200' = 365' \text{ (315' storage + 50' taper)}$$

$$\text{Method C} = 365' > \text{Method B} = 285'$$

Use Method C

Check Length for Thru-Block

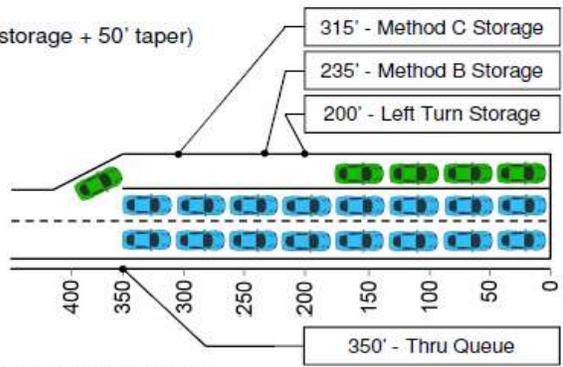

Refer to **Figure 401-10** to calculate thru lane(s) queue distance.

$$680 \text{ veh/hr} / 2 \text{ lanes} = 340 \text{ veh/hr/ln}$$

$$\text{Average Vehicles per Cycle} = \frac{(340 \text{ veh/hr/ln}) * (90 \text{ sec/cyc})}{3600 \text{ sec/hr}} = 9 \text{ veh/cyc/ln} \rightarrow 350 \text{ ft/ln}$$

Thru Block = 350' > Method C Storage = 315' → **Turn Lane Blocked**

Use 350' storage + 50' taper = **400' Turn Lane Length**

Lanes, Volumes, Timings

City of Canal Winchester

**Gender Rd. Improvements, Phase 5
September 3, 2019**

**Public Information Meeting Notes
Prepared by: wes**

- 1) Attendees signed in. A copy of the sign in sheet is attached to these notes.
- 2) Shane Spencer, PE provided opening comments and an overview of the project. Exhibits were displayed on the monitors and hard copies displayed on the table. The City will be seeking funding for the project through the Ohio Public Works Commission.
- 3) The project consists of two segments:
 - a) Gender Rd. & Canal St. Intersection:
 - i) Add northbound Right turn lane from Gender to Canal.
 - ii) Convert the traffic signal from span wire to mast arm.
 - iii) Separate the bike path from the pavement at the intersection to reduce bike/pedestrian - vehicle conflicts.
 - b) Gender Rd. & Winchester Blvd. Intersection:
 - i) Add northbound right turn lane from Gender to Winchester Blvd.
 - ii) Modify the traffic signal operation to accommodate the new lane.
 - iii) Separate the bike path from the pavement to reduce bike/pedestrian – vehicle conflicts.
 - iv) Improve the level of service during both the am and pm peak times.
- 4) No additional R/W is needed for the project.
- 5) Template comment forms and letters of support were made available.
- 6) Information from this meeting and a copy of the OPWC application will be posted on the City website.
- 7) Questions were taken from attendees:

Q: The separation of the bike path from the roadway is a good safety improvement. Can the path be separated from the pavement for the entire length between Canal St. and Winchester Blvd.?

A: There is a gap in the proposed path work of a few hundred feet between the Canal St. intersection and the Winchester Blvd. intersection. The path could be separated from the pavement in this area as well. The cost would likely be 100% local funds for this section of the path.

Q: What would be the funding split for the project?

A: We are proposing that the funding be 25% grant and 75% loan.

Department of Construction Services
36 S. High St. Canal Winchester, OH 43110
Office 614.834.5109 Fax 614.829.7734

Q: Have utility relocation costs been considered?

A: Yes, a cost of \$30,000 for utility relocation has been estimated. The most significant utility impact would likely be with SCP. The potential conflict area is not with the roadway pavement, but would be with the bike path and grading. The SCP poles are in the R/W and would be relocated within the R/W if necessary.

Q: What is the anticipated timeline for the project?

A: The funding application will be submitted this month. The initial results are generally available in December 2019. If successful, funds would be available in July 2020. Design would be complete by the end of 2020 and the project bid and constructed in 2021.

Re: Gender Road Improvements, Phase V
City of Canal Winchester

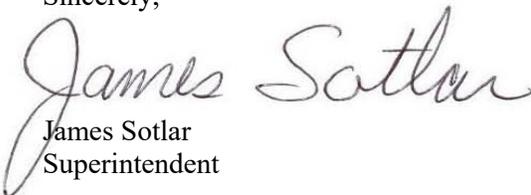

Dear Esteemed Members of the Public Works Integrating Committee:

This letter signifies my support of the Gender Rd. Improvement, Phase V project, for which the City of Canal Winchester is seeking financial assistance from the Ohio Public Works Commission. This project includes critical improvements to the intersections of Gender Rd. /Canal St., and Gender Rd. /Winchester Blvd. intersections that will positively affect our facilities and operations. As the superintendent of the Canal Winchester Local School District, I am well aware of the congestion issues at these intersections and the safety concerns related to traffic congestion. These issues directly affect the operational aspects of the Elementary Schools Campus and bus garage directly to the south of these intersections.

I understand as part of the project additional turn lanes and optimization of the traffic signal will mitigate much of the congestion issues and improve safety in the area. These improvements are necessary from an operational standpoint as the majority of the busses that leave the Elementary Schools Campus and travel north on Gender Rd., through these intersections. These improvements will reduce congestion and thus reduce travel times for our buses.

Once again, the Canal Winchester Local School District fully supports the efforts of the City of Canal Winchester to make necessary improvements proposed in the application. I trust the application will receive due consideration from the District Three Public Works Integrating Committee and will be selected for funding assistance based on its merits. If you have any questions or would like to discuss the matter further, please do not hesitate to contact me at 614-837-4533.

Sincerely,

James Sotlar
Superintendent

Dear Esteemed Members of the Public Works Integrating Committee:

I understand the City of Canal Winchester is seeking financial assistance from the Ohio Public Works Commission for the Gender Road Improvements, Phase V project. Opus Development Company is prepared to make a major investment in speculative industrial buildings on Winchester Blvd. just west of the project area. Our company fully supports the improvements proposed for Gender Road and the benefits that this project will bring to the residents and the businesses that rely on this important corridor. These enhancements will improve the access and safety in the area and assist with our ability to bring economic development to this community.

If you should have any questions or would like more information, please do not hesitate to call me at (317) 816-5723.

Sincerely,

Douglas Swain
Vice President, General Manager

Dear Esteemed Members of the Public Works Integrating Committee:

I understand the City of Canal Winchester is seeking financial assistance from the Ohio Public Works Commission for the Gender Road Improvements, Phase V project. As a community representative and non-profit business owner; I believe this project will greatly benefit this entire community. This improvement will significantly impact the businesses and residents of Canal Winchester in a way that will improve the quality of life here. I fully support the City's efforts in regard to this project and ask you to approve funding for the benefit of our community.

If you should have any questions or would like more information, please do not hesitate to call me at (614) 829-5800.

Sincerely,

Dear Esteemed Members of the Public Works Integrating Committee:

Please allow this correspondence to signify my support for the Gender Road Phase 5 project, for which the City of Canal Winchester is applying for funding. As a resident who travels this area often, I am aware of the safety issues and congestion issues in the project corridor. I feel that correcting these issues is a worthy project and one that will benefit the citizens of Canal Winchester and the surrounding areas.

PUBLIC MEETING
September 3, 2019

Gender Road Phase 5 Project

COMMENT FORM

We want your input regarding the Gender Road Phase 5 Project. Please leave this form with us at the meeting or fax it to us at (614) 775-4806. In order to include your comments with our OPWC Application, we must receive them by September 4, 2019.

Name: TREY HARTMAN

Address: 6947 Pearce Lane Canal Winchester OH 43110

1 – Please indicate your use of the Gender Road corridor
(check all that apply):

Resident of the City Business owner Truck/freight hauler

travel it for non-business Travel it for work

2 – In general, what is your reaction to the overall concept of improving the Gender Road Corridor? (Check one):

I support it because : it makes the roads in Canal look better and easier on traffic

I don't support it because : _____

3 – Do you live, work or own property that could be directly affected by any of the treatments presented at the meeting ? yes no.

If yes, please describe: ~~The road work will be on the back side of my house~~

(more on back page)

4 – Do you have any specific issues about the road, sidewalks, and/or trees you wish to have addressed? ___ yes no.

If yes, please describe: _____

5- Do you plan to write a letter of support for this project? yes ___ no

6- Would you like to be contacted via e-mail in regards to any new or additional information, which may come up in the future? yes ___ no.

SECTION A8: RECOGNIZED NEED

RESOLUTION NO. 19-020

A RESOLUTION TO ADOPT THE FIVE-YEAR CAPITAL IMPROVEMENTS PLAN/MAINTENANCE OF EFFORT FOR THE CALENDAR YEARS 2020-2024 FOR THE CITY OF CANAL WINCHESTER, OHIO

WHEREAS, the Director of Public Service maintains a five-year Capital Improvements Plan and Maintenance of Effort which it updates annually; and,

WHEREAS, the City's five-year Capital Improvements Plan and Maintenance of Effort provides a guide for the maintenance and improvements of public works infrastructure within the City.

NOW, THEREFORE, BE IT RESOLVED BY THE COUNCIL OF THE CITY OF CANAL WINCHESTER, STATE OF OHIO:

Section 1. That the Council of the City of Canal Winchester, Ohio hereby adopts the five-year Capital Improvement Plan/Maintenance of effort for the calendar years 2020-2024 as similarly attached and incorporated herein.

Section 2. That this resolution shall take effect and be in force from and after its passage.

DATE PASSED 9-3-19

PRESIDENT OF COUNCIL

ATTEST M. M. C. Piles
CLERK OF COUNCIL

District Transportation Engineer
ODOT District 6
400 E. William Street
Delaware, OH 43015

Subject: Systematic Signal Timing & Phasing Program Request
Gender Road and Winchester Boulevard

Dear Mr. Gross,

The City of Canal Winchester in collaboration with the City of Columbus is requesting the consideration to be included in the State's Systematic Signal Timing & Phasing Program (SSTPP) for the Gender Road corridor (between Dietz Drive and Lehman Road) and for the Winchester Boulevard corridor (between Prentiss School Drive and Waterloo Street). There are ten and three traffic signals for the Gender Road corridor and Winchester Boulevard corridor, respectively. Eight of the signals along Gender Road along with the three signals along Winchester Boulevard are owned and operated by the City of Canal Winchester. The remaining two signals along Gender Road are owned and operated by the City of Columbus.

The attached documents are submitted in support of the application. The traffic crash data for the 2015 through 2017 calendar years has been evaluated and reveals a high frequency of rear end collisions.

The Gender Road corridor has seen substantial growth and development in the last decade. As such the corridor has received funding for four phases of infrastructure improvements from the Ohio Public Works Commission between 2009 and 2016. Now that the construction of the fourth phase of the improvements is substantially complete, the City is seeking funding from the SSTPP in order to assure that the signal timing and phasing is optimized for the current infrastructure and traffic volumes in this important corridor.

Given the proximity and observed traffic interaction between the portions of Gender Road within the City of Canal Winchester's corporation limits with the signalized intersections of Gender Road at Winchester Pike and Lehman Road (under jurisdiction of the City of Columbus) we have coordinated with the City of Columbus and received confirmation of their willingness to include those two intersections within the scope of this study. With a majority of the study area being within the City of Canal Winchester, we envision the City of Canal Winchester to be the lead local agency on this inter-jurisdictional effort.

We appreciate your consideration of this request. Please do not hesitate to contact me at mpeoples@canalwinchesterohio.gov or (614) 384-5111 if you have any questions regarding this request.

Sincerely,

Matthew Peoples
Director of Public Service
City of Canal Winchester

Systematic Signal Timing & Phasing Program

Funding Request – Gender Road (SR 674) and Winchester Boulevard

The City of Canal Winchester, located in southeast Franklin County, has experienced rapid growth in the last 20 years with the population growing 58% between 2000 and 2010, with an additional 16% estimated growth from 2010 to 2017. The additional traffic due to population growth and development along the Gender Road corridor has necessitated the expansion of Gender Road. The corridor includes the interchange with US33, which is one of two interchanges that service Canal Winchester. The corridor has attracted substantial commercial development in the last 20 years, including a multitude of commercial developments at the interchange with US33, and recently, the BrewDog facility and the MacIntosh Skilled Nursing Facility.

The City has taken a proactive approach by improving the corridor incrementally beginning in 2009 through the present over four previous phases of construction. Funding was received from the Ohio Public Works Commission for the previous aforementioned phases of construction beginning in 2009 and concluding in 2016. The construction of the fourth phase of the Gender Road improvements is now substantially complete and is expected to be fully operational in the near term. The City is now looking to maximize their infrastructure investment by assuring that the signal timing and phasing is optimized for the current 2019 infrastructure and traffic volumes. With the ultimate goals being to reduce congestion and improve travel time. The City has reviewed and evaluated the traffic crash data for the Gender Road Corridor (between Dietz Drive and Lehman Road) as depicted in Figure 1, and for the Winchester Boulevard corridor (between Prentiss School Drive and Waterloo Street) as depicted in Figure 2.

On the south end of the study corridor (at Dietz Drive), Gender Road includes one through lane in each direction and dedicated left hand turn lanes for northbound and southbound traffic. The roadway widens incrementally to the north, reaching two through lanes and a left turn lane for northbound traffic, and two through lanes, two left turn lanes, and one right turn lane for southbound traffic at its widest at the intersection with Winchester Boulevard.

Winchester Boulevard at the intersection with Gender Road includes one through lane, 2 left turn lane, and one through lane for eastbound traffic, and one left turn lane, one right turn lane, and one through lane for westbound traffic.

There are a total of 10 signals on Gender Road in the study area and a total of 3 signals on Winchester Boulevard in the study area. Please note that the Gender Road / Winchester Boulevard signal is included in the totals of both corridors, therefore a total of 12 signalized intersections are included in the study area. Table 1 summarizes the signalized intersections in the requested study area.

Table 1 – Summary of Signalized Intersections

| Corridor | Cross Street | Maintaining Agency |
|----------------------|-----------------------|---------------------------|
| Gender Road | Dietz Drive | City of Canal Winchester |
| Gender Road | Fox Hill Drive | City of Canal Winchester |
| Gender Road | Groveport Road | City of Canal Winchester |
| Gender Road | Walnut Street | City of Canal Winchester |
| Gender Road | Canal Street | City of Canal Winchester |
| Gender Road | Winchester Boulevard | City of Canal Winchester |
| Gender Road | US33 Eastbound | City of Canal Winchester |
| Gender Road | US33 Westbound | City of Canal Winchester |
| Gender Road | Winchester Pike | City of Columbus |
| Gender Road | Lehman Road | City of Columbus |
| Winchester Boulevard | Prentiss School Drive | City of Canal Winchester |
| Winchester Boulevard | Gender Road | City of Canal Winchester |
| Winchester Boulevard | Waterloo Street | City of Canal Winchester |

Figure 1 – Gender Road Corridor

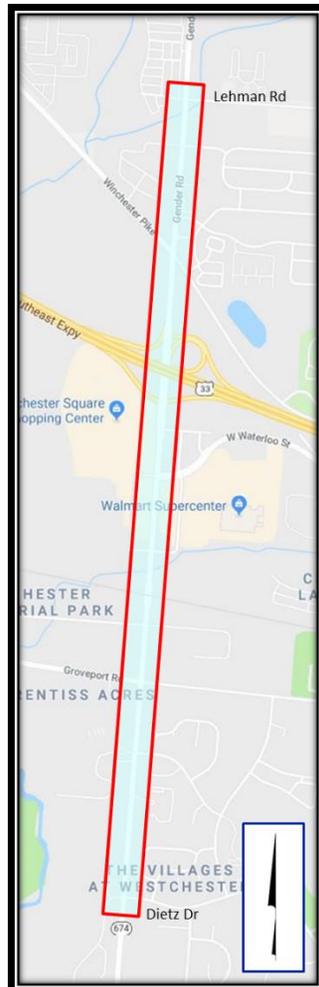

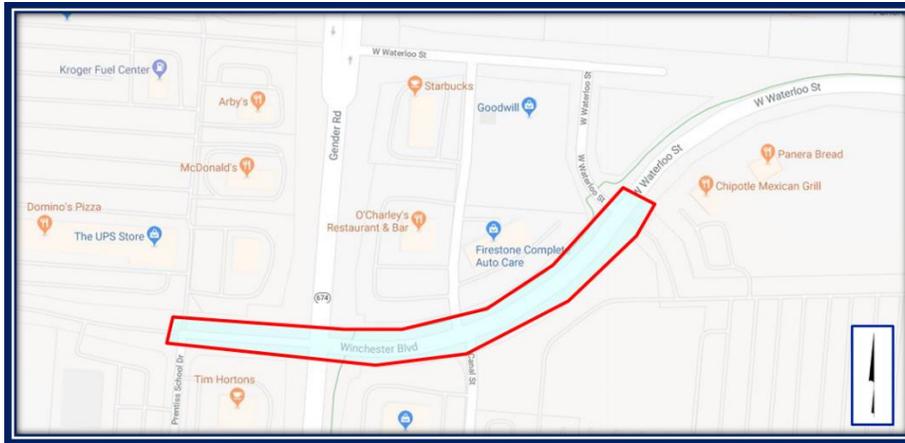

Figure 2 – Winchester Boulevard Corridor

Crash data for the two corridors for years 2015-2017 was retrieved from state GIS crash database.

For the Gender Road corridor, there were 337 crashes between 2015 and 2017. The crash summary by type as shown in Table 2 indicates that rear-end crash consist of 58.5% for all the crashes. Detailed information relative to the crash data is attached hereto.

Table 2 - Crash Summary for Gender Road Corridor

| TYPE OF CRASH | Number | % |
|----------------------|---------------|---------------|
| Rear End | 197 | 58.5% |
| Left Turn | 38 | 11.3% |
| Angle | 30 | 8.9% |
| Sideswipe - Passing | 19 | 5.6% |
| Fixed Object | 15 | 4.5% |
| Right Turn | 13 | 3.9% |
| Backing | 8 | 2.4% |
| Head On | 6 | 1.8% |
| Parked Vehicle | 3 | 0.9% |
| Pedestrian | 2 | 0.6% |
| Animal | 2 | 0.6% |
| Overturning | 1 | 0.3% |
| Sideswipe - Meeting | 1 | 0.3% |
| Pedalcycles | 1 | 0.3% |
| Other Non-Collision | 1 | 0.3% |
| Grand Total | 337 | 100.0% |

For the Winchester Boulevard corridor, there were 57 crashes between 2015 and 2017. Table 3 shows the summary of crash type. Almost half of the crashes are rear-end type. Detailed information relative to the crash data is attached hereto.

Table 3 - Crash Summary for Winchester Boulevard Corridor

| TYPE OF CRASH | Number | % |
|----------------------|---------------|---------------|
| Rear End | 24 | 42.1% |
| Left Turn | 13 | 22.8% |
| Sideswipe - Passing | 8 | 14.0% |
| Angle | 5 | 8.8% |
| Right Turn | 3 | 5.3% |
| Backing | 3 | 5.3% |
| Fixed Object | 1 | 1.8% |
| Grand Total | 57 | 100.0% |

In conclusion, there was a high frequency of rear-end type crashes in the two corridors between 2015 and 2017. The second most frequent type of crash was left hand turn conflicts in the 2015 through 2017 time period. Optimizing the timing of the existing signals is an effective countermeasure to reduce rear-end crashes and improve safety by effectively coordinate signals for the two corridors.

Subject: Gender Road Retiming

All,

We've looked over the formal request for the retiming of the Gender Road corridor and are ready to proceed. Our new round of funding for the programmatic should be ready to go here in the next few weeks, so I'd like to get a jump on getting the initial information so we can get started immediately after that happens. Attached are the scope and kickoff documents that will need to be completed for this project. Please let me know if you have any questions or need any guidance. Since there are two municipalities involved, the kickoff document can be done in coordination, or can just be completed separately and I can combine them later.

Thanks,

Jeremy L. Thompson

- Transit Center
- Park & Ride

HOW TO RIDE

with COTA

- KNOW YOUR**
- Line number
 - Departure time and location
 - Destination

ARRIVE EARLY

• Arrive at your bus stop five minutes before your bus is scheduled to leave. Check the sign above the front windshield for the line number and destination.

HAVE FARE READY

• Pay your fare at the farebox when you board. If you will transfer, ask the bus operator for a transfer pass before you pay your fare. Transfers are free and valid for two hours from the time of issue. Transfers can only be used to continue your trip in one direction.

SIGNAL TO STOP

• When the bus is approaching your stop, push the yellow strip or pull the cord located by the window near your seat to ring the stop signal. When the bus stops, exit through the rear door.

GET YOUR BUS IN GEAR

be prepared

Keep you and your bus on time.

- Always be sure to:**
- Arrive at your stop five minutes early.
 - Be visible—step outside of the shelter if you are in one and remain close to the bus stop sign.
 - While you are waiting, prepare your fare. Have fare ready when you board the bus.
 - Motion to the operator as your bus approaches.

STROLLERS

ride buses too

COTA is happy to accommodate strollers when the bus operator feels there is plenty of space to keep everyone safe.

- Strollers and carts cannot block aisles or doorways.
- Your operator will instruct you where to position your stroller or cart depending on how many passengers are riding the bus.
- Be sure to remember that seats in the front of the bus are for those with disabilities.

Time names BrewDog's Canal Winchester hotel among greatest places on Earth

By [Patrick Cooley](#)

Posted Aug 27, 2019 at 11:57 AM

Updated Aug 28, 2019 at 6:45 AM

BrewDog's DogHouse Hotel in Canal Winchester recently was named one of the best places to visit by a prominent national publication.

Time magazine included the hotel in the "To Stay" section of its annual list of the [100 greatest places on Earth](#).

Time generated its list by polling editors, correspondents and industry experts, according to the magazine's website. Each location was evaluated based on factors "including quality, originality, sustainability, innovation and influence," the site says.

[Get the news delivered to your inbox: Sign up for our morning, afternoon and evening newsletters](#)

Beer lovers who stay at the hotel are never wont for something to drink, as each room features beer taps and coolers filled with cans of beer. One of those coolers is within arm's reach of the shower, so hotel guests can enjoy a cold one while they wash up.

The hotel rooms are situated alongside the company's massive Gender Road brewery and taproom, which also serves as the Scottish company's U.S. headquarters.

The hotel officially opened for business in August 2018.

Some of the rooms offer a bird's eye view of the brewery floor where BrewDog employees concoct the company's products.

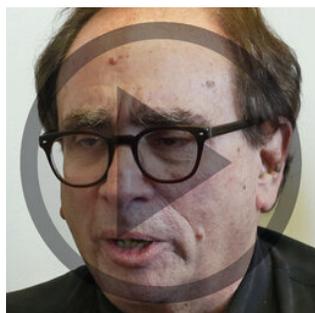

The hotel boasts 32 rooms that wrap around BrewDog's largest U.S. taproom. The space includes a pond and a dog park.

The magazine's list of places to stay also includes architectural wonders such as the InterContinental Shanghai Wonderland, a hotel built into the side of an abandoned quarry; massive cruise ships such as the Norwegian Joy, which boasts its own go-kart track and laser tag arena; and camping destinations such as the AutoCamp in Yosemite, California.

1.0 INTRODUCTION

Evans, Mechwart, Hambleton & Tilton, Inc. (EMH&T) was commissioned by City of Canal Winchester to conduct a traffic study for the Gender Road/Groveport Road intersection. The subject intersection is located in City of Canal Winchester as shown in **Figure 1**. This study consists of Opening Day (2014) and Design Year (2034) analysis.

FIGURE 1
Location Map

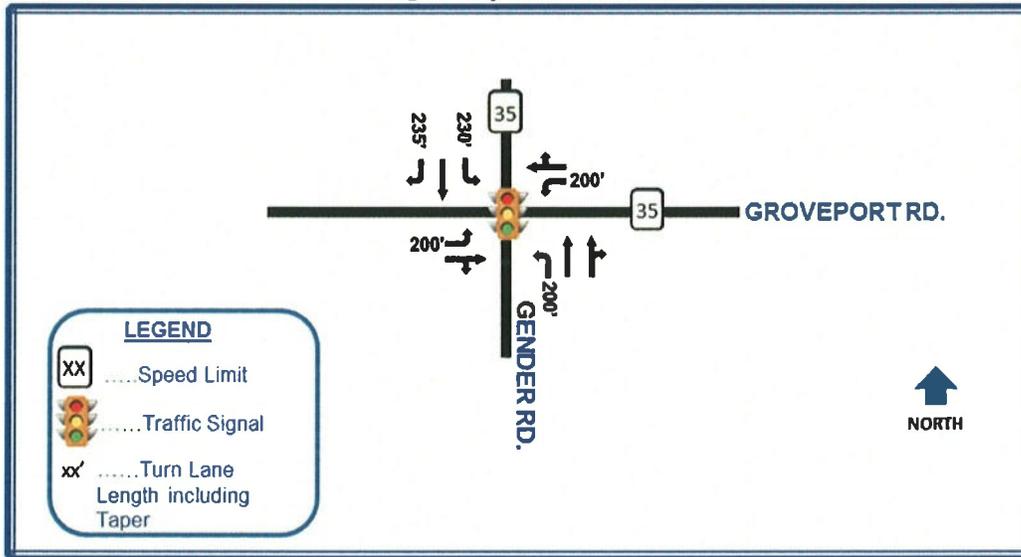

2.0 EXISTING STUDY AREA CONDITIONS

A schematic representation of existing study area conditions has been documented in **Figure 2** and described below in further detail.

Gender Road north of Groveport Road is a five-lane, north/south roadway with a posted speed limit of 35 miles per hour. One southbound through lane terminates as a right turn lane at Groveport Road and only one lane continues through the intersection. Gender Road south of Groveport Road is a two-lane, north/south roadway with a posted speed limit of 35 miles per hour. A northbound left turn lane and second through lane are developed on the approach to

Groveport Road. Groveport Road is a two-lane, east/west roadway with a posted speed limit of 35 miles per hour. Gender Road intersects Groveport Road under traffic signal control and left turn lanes are available on Groveport Road on both approaches to the intersection.

FIGURE 2
Existing Study Area Conditions

3.0 DATA COLLECTION

Manual turning movement counts were conducted by EMH&T personnel at the subject intersection on Thursday, August 1, 2013 from 4 PM to 6 PM. This count data was compared to 2010 counts from obtained from the Mid-Ohio Regional Planning Commission (MORPC). The 2013 count volume is approximately 8% lower than the count volume in 2010. However, the population of Canal Winchester increased by 4% between 2010 and 2012 and there are school facilities south of the intersection that were not in session during the 2013 count. Therefore, the 2010 count was used in this study and appropriate growth factors were applied to obtain future volume projections as described below.

Traffic count data sheets have been included in **Appendix A**.

4.0 TRAFFIC VOLUME PROJECTIONS

For this study, two sets of future traffic volumes were projected and they are year 2014 for opening day and year 2034 for design year as shown in **Figure 3** and **Figure 4**, respectively. Volumes used in the determination of a traffic growth rate were 2010 ADT (MORPC) and 2030 ADT (Canal Winchester Transportation Thoroughfare Plan, 2009). Annual compound growth rates of 1.3% on Gender Road and 3.6% on Groveport Road west of Gender Road were applied to counted traffic to determine opening day and design year volumes. Projections for Groveport Road east of Gender Road showed negative or no growth from 2010 to 2030 but we

conservatively assumed a positive 0.5% compound annual growth rate for this approach. Detailed traffic volume calculations have been included in **Appendix B**.

FIGURE 3
Year 2014 Traffic Volumes

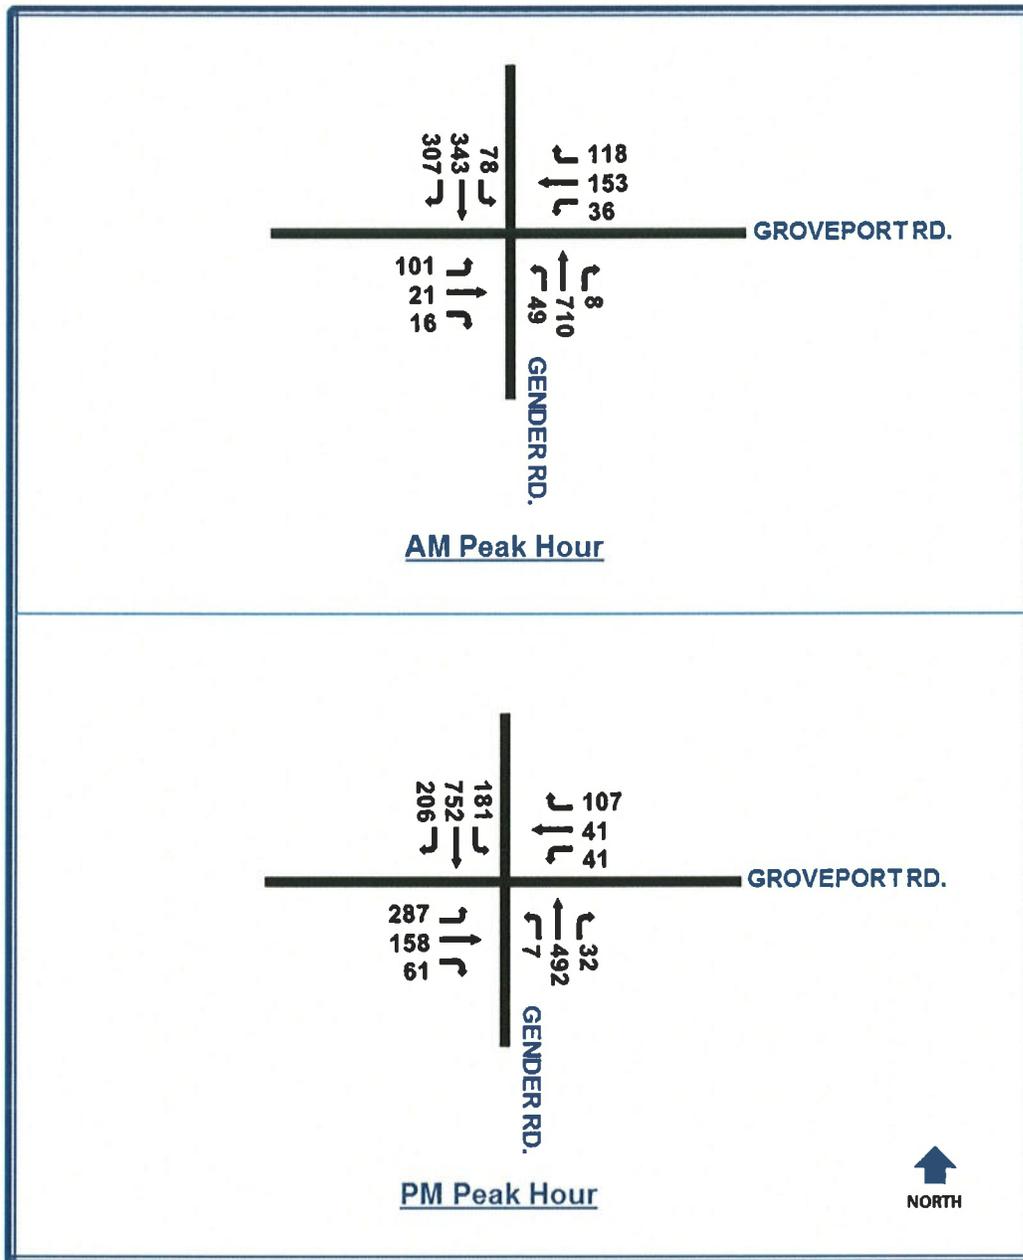

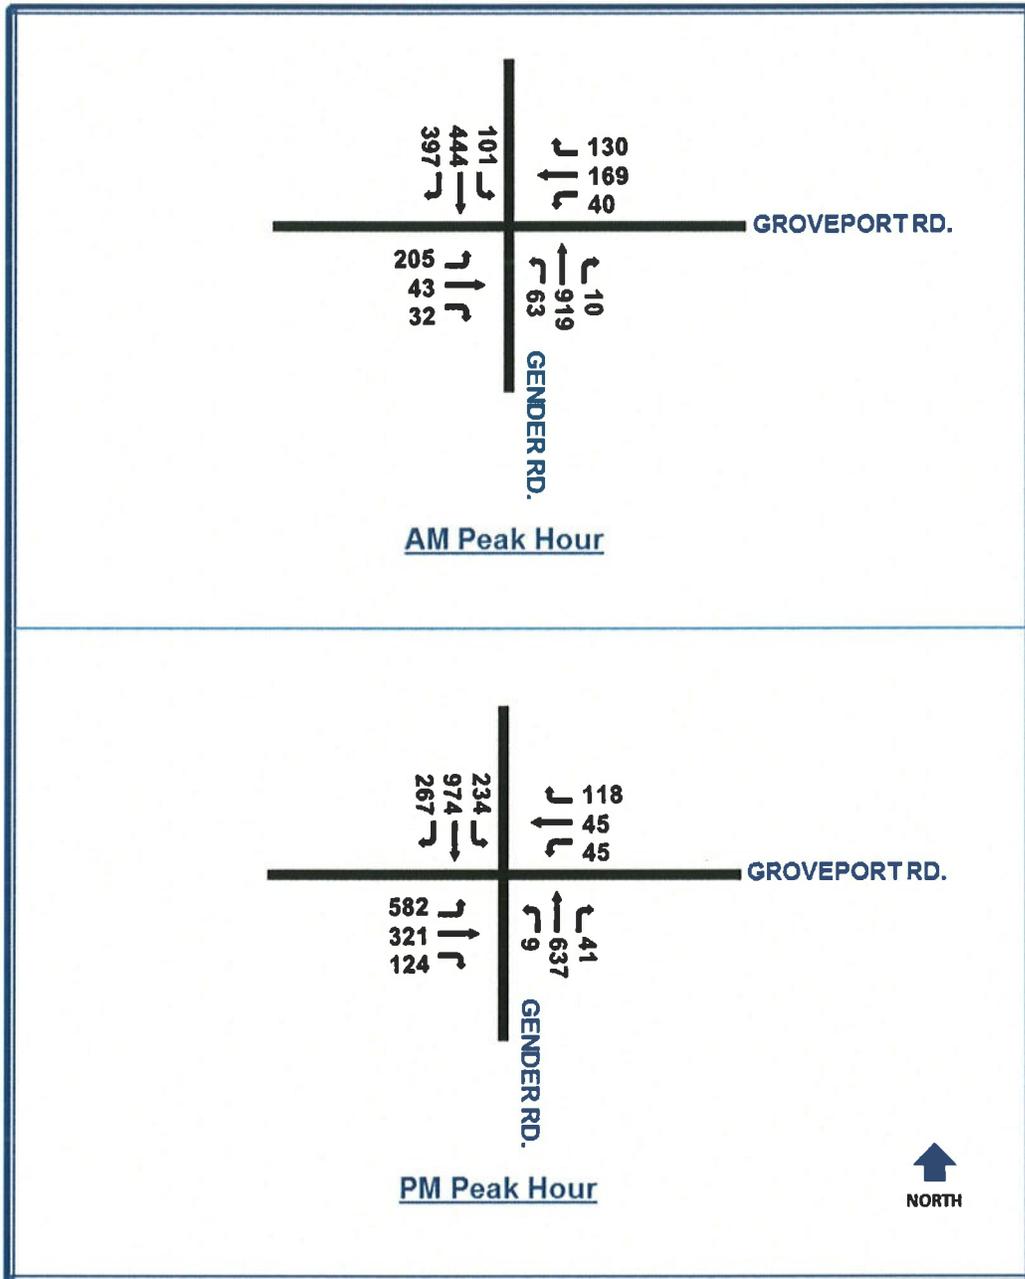

FIGURE 4
Year 2034 Traffic Volumes

5.0 TRAFFIC ANALYSES

5.1 Capacity Analyses

Synchro 8 was used to evaluate operational characteristics of the intersection based on future projected traffic volume conditions. Intersections are graded using a level of service designation. Levels of Service (LOS) are expressed in terms of letter grades with LOS A representing the highest quality traffic flow and minimal delay, and LOS F representing poor traffic operations and significant delay. The analysis results have been summarized for different alternatives as presented in **Table 1**. Detailed capacity analysis reports are provided in **Appendix C**.

The intersection will operate at LOS B and LOS C during AM and PM peak hours in year 2014. All movements will operate at LOS D or better. No geometric improvement is recommended.

The intersection will operate at LOS F without any improvement during PM peak hour in the design year 2034. This intersection can be improved to LOS C (during AM peak hour) and LOS D (during PM peak hour) with the alternate improvements shown in **Figure 5**. Alternate A limits improvements to the southbound approach while avoiding widening on other intersection approaches. But Gender Road would have to be improved to add a second receiving lane south of the intersection extending to a logical terminus to the south. While Alternate A produces acceptable LOS on the eastbound approach without improvements, a disproportionate amount of signal green time is required to accommodate the projected eastbound left turn volume (582 vehicles) in a single lane. Alternate B also adds a second southbound through lane similar to Alternate A, but does not require widening for a southbound right turn lane. Instead, the eastbound approach would be improved to provide dual left turn lanes and a dedicated right turn lane providing for more balanced signal operation.

5.2 Turn Lane Length Calculations

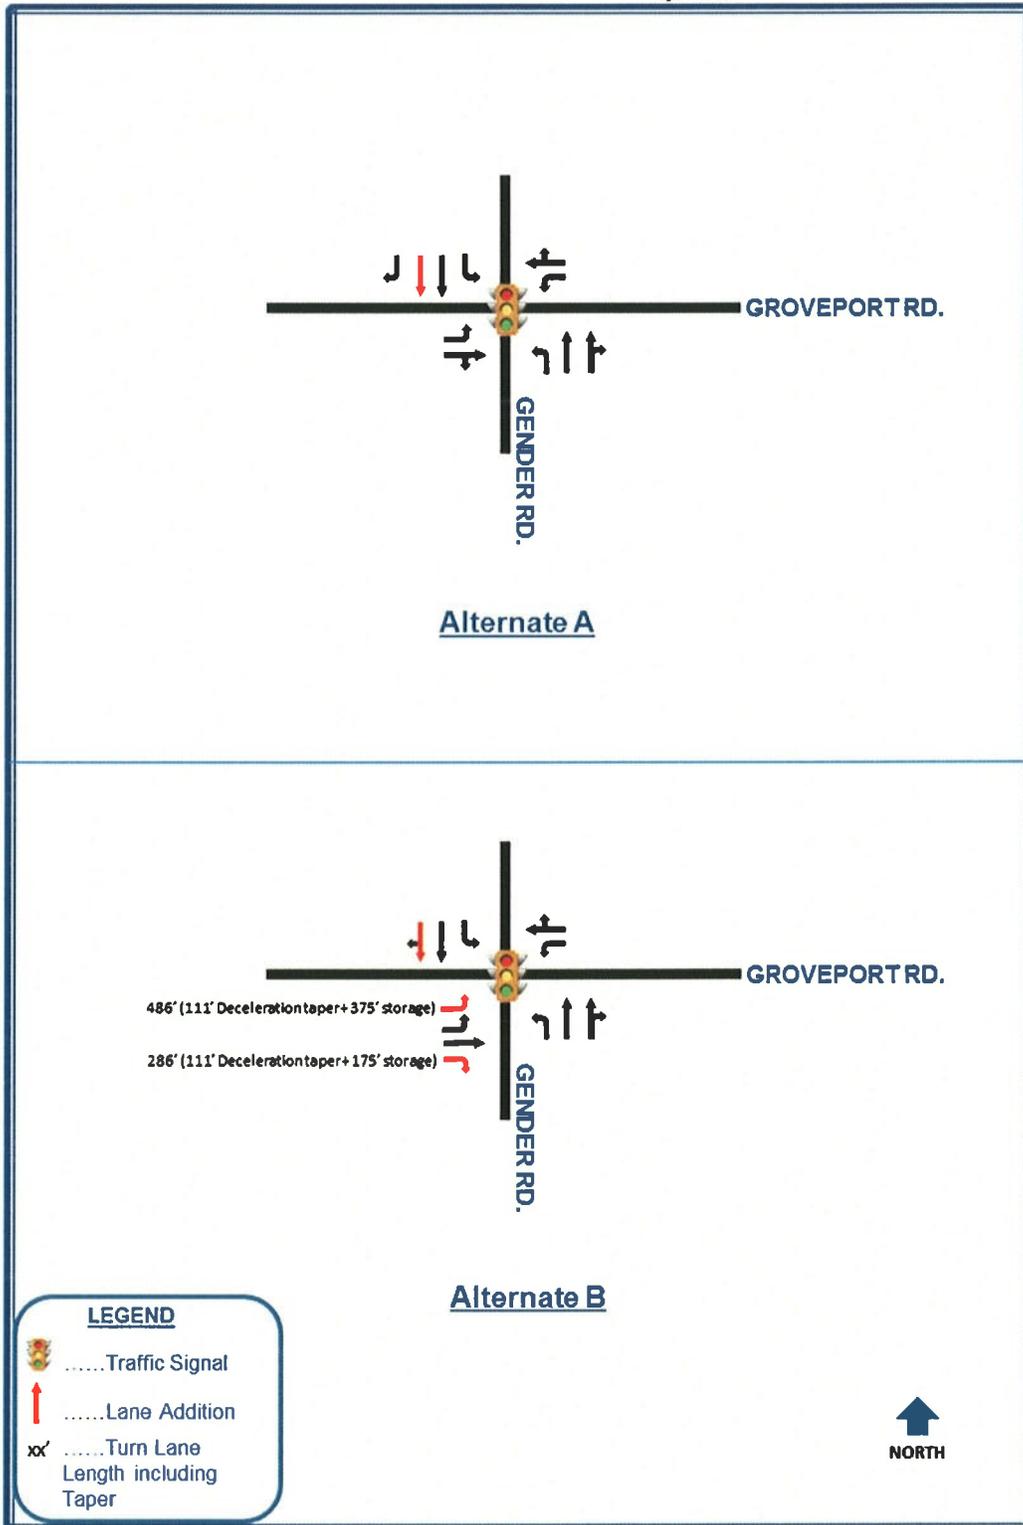

Turn lane lengths were calculated for Design Year 2034 based on procedures outlined in the Ohio Department of Transportation Location and Design Manual, Volume 1 (ODOT L&D Manual). The calculated eastbound dual left turn lane is 486 feet (taper included) and eastbound right turn lane is 286 feet (taper included). Detailed analyses are provided in **Appendix D**.

TABLE 1
Capacity Analysis Results

| Time Period | Year | Scenario | Eastbound | | | | Westbound | | | | Northbound | | | | Southbound | | | | TOTAL |
|--------------|------|---------------|-----------|--------|--------|----------|-----------|--------|--------|----------|------------|--------|--------|----------|------------|---------|--------|----------|--------|

6.0 CRASH ANALYSIS

Crash data for 2010, 2011, and 2012 was collected from the Ohio Department of Public Safety. There were 9 crashes for the three year period comprised of 3 crashes each year. One of the crashes produced an injury, none were fatal, and the rest resulted in property damage only. The most common type of crash at the intersection was rear-end with three of those occurring on the southbound approach and two occurring on other approaches. No pattern or frequency of crashes was identified that requires mitigation beyond the recommendations in this report. A copy of the crash reports, summary tables, and graphs is provided in **Appendix E**.

7.0 CONCLUSION AND RECOMMENDATIONS

The Gender Road/Groveport Road intersection supports existing traffic volumes and near term growth at an acceptable LOS C. Traffic volumes are significant, particularly the eastbound left turn of 249 vehicles and southbound through volume of 714 vehicles, both in single lanes during the afternoon peak hour. As the area continues to grow, congestion will increase so that by the design year, the intersection will experience poor, peak-hour LOS if no improvements are provided. Both alternates A and B will provide acceptable LOS by adding capacity to the southbound and, the case of Alternate B, eastbound approaches.

Alternate A limits the scope of improvements to the southbound direction only. But a more significant improvement to Gender Road is required under Alternate A to add a southbound right turn lane in addition to the southbound through lane. Adding a southbound through lane for Alternate A or B requires the addition of a second receiving lane south of the intersection extending to a logical terminus to the south.

Alternate B adds a second southbound through lane similar to Alternate A, but does not require widening for a southbound right turn lane. Instead, the eastbound approach would be improved to provide dual left turn lanes and a dedicated right turn lane. This alternate better accommodates the heavy left turn movement from eastbound to northbound with more balanced signal operation compared to Alternate A.

Alternate B is recommended as the ultimate, long-term solution. Current intersection operations provide reasonable levels of service and the City therefore has time to program improvements and stage construction as funding is identified. Widening the eastbound approach to provide for dual left turn lanes and a dedicated right turn lane is recommended as a first priority. This is the intersection approach where the highest rate of growth is expected based on the City's Thoroughfare Plan. Improvements to add a second southbound through lane require adequate capacity extended to points south. This additional through lane can be broken out as a separate improvement and funded as a second priority if desired.

TAX INCREMENT FINANCING AGREEMENT

This Tax Increment Financing Agreement (this "Agreement"), made and entered into as of this 14th day of October, 2008, by and between the VILLAGE OF CANAL WINCHESTER, OHIO (the "Village"), a municipal corporation organized and existing under the Constitution and the laws of the State of Ohio and its Charter, and GREENFIELD DEVELOPMENT COMPANY, an Ohio non-profit corporation (the "Developer").

WITNESSETH:

WHEREAS, on December 17, 2007, this Council passed Ordinance No. 73-07, establishing a TIF area on certain parcels of real property depicted in Exhibit A attached hereto ("the "Original TIF Area"); and

WHEREAS, on August 18, 2008, this Council passed Ordinance No. 45-08, amending Ordinance No. 73-07 to include certain additional parcels of real property depicted in Exhibit A attached hereto (with each current or future parcel of such real property, together with each current or future parcel comprising the Original TIF Area, referred to herein individually as a "Parcel" and collectively as the "Parcels") to the Original TIF Area established by that Ordinance No. 73-07; and

WHEREAS, in order to successfully develop the Parcels, it is necessary to construct or to cause to be constructed certain public infrastructure improvements as described in Exhibit B attached hereto (the "Public Infrastructure Improvements"), which Public Infrastructure Improvements the Village and the Developer agree will directly benefit the Parcels; and

WHEREAS, the Village, by its Ordinances No. 73-07 and No. 45-08 (together, the "Ordinance"), has declared that one hundred percent (100%) of the increase in the assessed value of each Parcel subsequent to the date set forth in the Ordinance (such increase hereinafter referred to as the "Improvement," as further defined in Ohio Revised Code Section 5709.40 and the Ordinance) is a public purpose and is exempt from taxation for a period commencing with the first tax year that begins after the date set forth in the Ordinance and in which an Improvement due to the construction of a new structure on that Parcel first appears on the tax list and duplicate of real and public utility property for such Parcel and ending on the earlier of (a) thirty (30) years after such commencement or (b) the date on which the Village can no longer require service payments in lieu of taxes, all in accordance with the requirements of Ohio Revised Code Sections 5709.40, 5709.42 and 5709.43 and the Ordinance (the "TIF Exemption"); and

WHEREAS, subject to any tax exemption under Ohio Revised Code Sections 3735.65 through 3735.70 or 5709.61 through 5709.69, the Village has determined that it is necessary and appropriate and in the best interest of the Village to provide for the current owner and any future owners of each Parcel (with the Developer and each such future owner referred to herein individually as an "Owner" and collectively as the "Owners") to make annual service payments in lieu of taxes with respect to any Improvement allocable thereto (collectively for all Parcels, the "Service Payments") to the Fairfield County Treasurer (the "County Treasurer"), which Service Payments will be (i) used to pay costs of construction of the Public Infrastructure Improvements, plus interest thereon, and (ii) distributed to the Canal Winchester Local School District (the "School");

ORDINANCE NO. 42-07

AN ORDINANCE TO AMEND THE STORMWATER MANAGEMENT CODE ADOPTED BY ORDINANCE NO. 28-05 TO ESTABLISH CUSTOMER CHARGES AND CREDIT MECHANISMS

WHEREAS, in order to maintain an appropriate level of compliance with the National Pollutant Discharge Elimination System's (NPDES) Phase II Stormwater Regulations, it is the recommendation of the Director of Public Works that the Stormwater Management Code be amended to establish justifiable and quantifiable rates and credit mechanisms that are based on individual parcels' impervious area, and

WHEREAS, the Director of Public Works in cooperation with the Village Engineer has established customer charges and credit mechanisms to provide revenue to the Stormwater Utility to fund ongoing compliance and capital projects to comply with the Phase II regulations.

NOW, THEREFORE, BE IT ORDAINED BY THE COUNCIL OF THE VILLAGE OF CANAL WINCHESTER, STATE OF OHIO:

SECTION 1: That the Stormwater Management Code (Chapter 941 of the Codified Ordinances) Plan for the Village of Canal Winchester, Ohio, adopted by Ordinance # 28-05 be and hereby amended to read as set forth on the revised version of Chapter 941 as attached hereto as in Exhibit A and incorporated herein by reference, establishing the customer charges and credit mechanisms to provide revenue for the stormwater utility fund.

SECTION 2: That this ordinance shall take effect and be in full force from and after the earliest period allowable by law.
